

Lilja Laatikainen

Superoxide dismutase 3-mediated cell survival and proliferation

Annales Medica-Odontologica, Ser. D 1001

Errata

p. 12, line 27

Two enzymes closely related to Nox are the dual function oxidases (Duox; aka thyroid oxidase, Thox) with an additional peroxidase domain whose function in H₂O₂ production, however, is as yet unclear (De Deken *et al.*, 2000).

p. 59, line 9

RET/PTC mutations are common especially in radiation-induced PTCs, but occur also sporadically; however, in different studies the frequencies vary widely between 0-87% in radiation-induced and 0-61% in sporadic PTCs (reviewed in Tallini and Asa, 2001).
