Analyzing Finland's Manga Scene – A Bibliographical Study on Manga Comics Translated into Finnish and Published in Finland
Number of pages: 61 pages, 46 pages in appendices

This thesis aims to explore Finland's manga scene through a bibliographical analysis of all manga volumes translated into Finnish and published in Finland from 1985 to the end of 2025. The purpose of this study is to discover what kinds of manga series have been translated into Finnish and published in Finland and if there are any translation policies (Toury 2012, 82) that Finnish manga publishers may follow. Moreover, this thesis aims to make conclusions about manga publication in Finland.

To achieve this, a bibliographical study was conducted by creating a catalogue based on Mika Simanainen's (2025) already existing catalogue, freely accessible on his website Tokio.fi. Simanainen's catalogue was expanded upon by including information about target demographics and translators, and by filling in gaps where information was insufficient. Furthermore, research was conducted on all publishers that have published manga in Finland and findings were compiled. An interview was also conducted with Sangatsu Manga / Punainen jättiläinen, one of Finland's active manga publishers. Finally, data from the catalogue was analyzed through various graphs, and conclusions were made by linking all findings together.

Key results of the study reveal that a total of 233 different manga series and 2047 total individual volumes of manga have been released in Finland. Series of various genres have been released for various target demographics, but publishers appear to have a clear preference for publishing shounen manga and genres associated with it, such as action and adventure. Therefore, it can be argued that publishers appear to have a translation policy that largely focuses on releasing series that appeal to readers of all ages and genders, which shounen manga is known for.

Key words: manga, Japanese comics, publishing, translation, translation policy, manga publishing in Finland, manga in Finnish

1 Introduction

Japanese comics, better known as *manga*, have a long history comparable to any other form of art. Its roots can be found in illustrated paper scrolls from the 11th century, but manga as we know it today was born after the second world war when influence from American comics mixed with traditional Japanese arts (Gravett 2005, 12–13; 18). In Japan, manga is first serialized chapter-by-chapter in specialized magazines that typically have 200 to 400 pages an issue but can even reach over 1000 pages. These magazines, released weekly or monthly, are cheap and flimsy, not meant to be collected or stored, and feature multiple different series by different manga authors and illustrators, also known as *mangaka*. Later, specific manga series are released volume-by-volume in a format known as *tankobon*, which is similar to a paperback and features about 200 pages. It is not unusual for a single series to have 20, 30, 50 over even 100 volumes, but other stories are more compact and can be told in just a couple volumes (Gravett 2005, 13–15). Nowadays, manga is also released electronically, and the sales of printed manga in Japan are falling (Nippon Communications Foundation 2025). However, the overall sales of printed and electronic manga have been on the rise for seven consecutive years. It can therefore be argued that the readership in Japan is shifting to from printed media to digital media (ibid.). Manga readers in Finland still consume their series through physical media, although publishers like Sangatsu Manga have considered the possibility of releasing manga electronically, if e-books ever reach popularity in Finland (Valkama 2026).

This thesis is specifically interested in the history of manga translated and published in Finland and thus will not delve deeper into the general history of manga as an artform or its publication in other countries. The first manga translated into Finnish and published in Finland was *Hiroshiman poika* by Nakazawa Keiji (Valkama 2024b), also known as *Hadashi no Gen* and *Barefoot Gen* in Japanese and English respectively. The original manga was published from 1973 to 1974 and consisted of 10 volumes. The Finnish translation of volume 1 came out in 1985, but for its second and final translated volume to be released, Finnish readers had to wait until 2006. After some time, translated volumes of Otomo Katsuhiro's *Akira* (1982) started releasing slowly from 1995 to 2006. This series would see all of its volumes released to completion, although it took until the beginning of the manga boom in Finland for its final volumes to be released. In 2003, the third manga to be published in Finland, *Dragon Ball* (1984) by Akira Toriyama, received its Finnish translation, which would set off the real start of the boom alongside Rumiko Takahashi's *Ranma ½* (1987), the translation of which also

begun publishing later that same year. Compared to the first two attempts, these releases stood out for their unique publishing strategy: instead of specialized bookstores, volumes were released in stores of all sizes, from hypermarkets to convenience stores, next to magazines and paperbacks (Valkama 2024b). This practice of publishing manga in retail stores appears to be unique to Finland (Tommi 22 February 2024). In fact, it appears to be a practice no other European country partakes in. In the rest of the world, manga is most commonly sold in bookstores and comic stores (ibid.). However, this practice unique to Finland has its benefits: manga can be brought in front of audiences that might not wander into the depths of a bookstore or be familiar with the medium. In the 2000s, prices in retail stores were also low enough that even a child could purchase a volume if they so desired (Valkama 2024b). While older generations might avert volumes featuring characters with large anime-style eyes, it is entirely possible they pick up a manga series like *Chi's Sweet Home* by Kanata Konami, which depicts more palatable and familiar imagery of talking animals (Uusitalo 2016, 37). While Finnish readers could always purchase manga from bookstores and comic stores alike, nowadays both in-person and online, retail stores are still a significant sales channel for manga in Finland (Valkama 2026). The biggest change that has come with the 2020s must be the pricing of manga. For example, upon glancing at the back cover of a volume of PEACH-PIT's *Shugo Chara!* that I bought in 2010, the price listed is 5,90 euros, but the recent reprint from 2022 is being sold for 10,90 euros (PEACH-PIT 2010; Suomalainen Kirjakauppa n.d.). To the best of my research, manga in Finland has always been released volume-by-volume, most commonly as paperbacks or in rare occasions as hardbacks, such as Sangatsu Manga's release of Osamu Tezuka's *Viidakon valtias* (Japanese title: *Jungle Taitei*, English title: *Kimba the White Lion*). Today, enough manga has been released in Finland to fill rows and rows of shelves in the homes of hobbyists, libraries and various stores, which makes manga in Finland a compelling research topic.

Research on manga comics that have specifically been translated into Finnish and published in Finland is sparse. Although Simanainen (2025) has kept track of all manga published in Finland, his catalogue has not yet been utilized for an in-depth academic analysis. In 2013, Petteri Uusitalo wrote an article in a Finnish magazine for manga and anime hobbyists, straightforwardly titled *Anime*, which rounded up the 10-year-long history of manga published in Finnish retail stores. The article is only two pages long and functions largely as a brief summary. In 2016, Uusitalo wrote another article for *Anime*, which aimed to study myths regarding target demographics of manga published in Finland, which presented its

results in a similarly brief manner. In the academic sphere, Jari Nyman's thesis titled *The History of Manga: Japanese Comics, Their History, Evolution, Significance and Selection for Library Collections* (Nyman 2015; my translation) has a chapter that briefly summarizes the history of manga publication in Finland. However, his study does not delve deeper into which and what kinds of manga series have been published in Finland. To conclude, Uusitalo's articles and Nyman's thesis were all published last decade, and as time passed, there have been changes in Finland's manga publication scene that have not yet been academically documented. Therefore, a brand-new and in-depth bibliographical study on the topic is justifiable. The results of this study could prove useful or interesting to hobbyists and professionals alike, and others interested in manga or specifically its publication outside of the English-speaking world.

In this thesis, I aim to answer the following questions: What kinds of manga series have been translated into Finnish and published in Finland? Furthermore, are there any translation policies that Finnish manga publishers may follow? Ultimately, what kind of conclusions can be made about manga publication in Finland? To answer these questions, I will conduct a bibliographical study of all manga series translated into Finnish and published in Finland by creating a catalogue of said publications. This catalogue is based on the already existing Tokio.fi's catalogue of manga published in Finland, maintained by Mika Simanainen (2025). His catalogue has been listing manga released in Finland since 2006, holding the complete listing of all publications, and is also endorsed as an information source by the publisher Sangatsu Manga (2025), arguably the most notable publisher of manga in Finland. This catalogue already includes information about each title, such as release date, publisher and number of volumes, but the catalogue of this study has expanded upon this information by adding metadata such as the translator of each volume and the target demographic of each title. To add further context to the findings of this study, an interview was also conducted with an active publisher of manga in Finland: Sangatsu Manga / Punainen jättiläinen. Therefore, the material and methodology of this study is largely quantitative, but qualitative research was also conducted to support the numerical data with research of manga publishers in Finland throughout the years. This thesis will begin by first introducing background information about manga as a medium, including categories for target demographics, genres in manga and what it is like to translate manga. After that, the thesis will introduce its supporting theoretical framework: previous studies on manga in Finland, translating between two peripheral languages and translational norms. Moving on, the material and methodology of this study will be explained in

detail, after which comes the analysis section, where six different publishers of manga in Finland and their history with manga publishing will be first introduced in an attempt to contextualize the following quantitative research. In the latter half of the analysis section, findings from the bibliographical analysis will be presented and discussed. By the end, this study attempts to conclude what manga publication in Finland has come to in the second decade of the 21st century and make projections for its future.

2 Theory and Background

In this chapter I will be introducing manga as a medium in greater detail, including an overview of manga's target demographics and genres, and the challenges that come about translating manga. Furthermore, existing research on manga conducted in Finland will be briefly introduced. After that, I will go over the theoretical framework this thesis is built upon: translating between two peripheral languages and translational norms.

2.1 Manga as a Medium

Most people have likely read at least one comic sometime in their life. It might have been just a small comic strip in your local newspaper, perhaps an advertisement, or even a full graphic novel part of a series, but regardless of its exact form, most people have read a comic. The same cannot be argued about manga, which is a largely unknown medium outside of its home country and excluding its dedicated fans overseas. While many have heard of it, or perhaps just seen it unknowingly, it might be difficult to identify what exactly makes it different from all other comics. Jüngst (2004, 83) has defined manga as follows:

> *Manga* (the singular and plural form are the same) are Japanese comics. They correspond to their Western counterparts insofar as they are texts in the comics format with panels (single pictures in a sequence), speech balloons for dialogue, inserts for other texts, and onomatopoeia, which are integrated into the pictures. Like Western comics, they can appear in various media (print, internet) and they come in a variety of genres (fiction genres such as adventure stories or romance; non-fiction genres such as biographies or science textbooks). *Manga* are thus texts in the comics format, which have culture-specific features as far as drawing styles, book length and circulation are concerned. (Jüngst 2004, 83)

Sometimes, one might overhear someone referring to manga as a 'genre'. Merriam Webster defines genre as follows: "a category of artistic, musical, or literary composition characterized by a particular style, form, or content" (*Merriam Webster Dictionary*, s.v. "genre" (n.)). While manga stands apart from typical Western comics, arguably in style, form and content, I would argue that it is a medium for storytelling rather than a singular genre of storytelling. Within the medium of manga, one can find a rich selection of stories from all kinds of genres, intended for audiences of all ages. It would simply be incorrect to try to label manga as one homogeneous genre. Fabbretti and Idone Cassone (2025, 362) present five publishing categories of manga for targeting different demographics: **children**, **shounen** (boys), **shoujo** (girls), **seinen** (young adult men) and **josei** (women). These categories are typically magazine-based, meaning any series published in a magazine that primarily targets young boys is considered to

be a shounen series (ibid.). It is not uncommon to hear someone referring to these categories as genres. In fact, they are frequently referred to as so in academic context as well, such as in *Manga : An Anthology of Global and Cultural Perspectives* (2010), edited by Toni Johnson-Woods. However, I believe there is a crucial distinction to be made here: the publishing categories are more like arbitrary boxes inside of which works of various genres exist. Indeed, within shounen, shoujo, seinen and josei manga, there are what one would traditionally consider genres when describing works of fiction. For example, MyAnimeList (n.d. a) categorizes series based on these genres: action, adventure, avant garde, award winning, boys love, comedy, drama, fantasy, girls love, gourmet, horror, mystery, romance, sci-fi, slice of life, sports, supernatural and suspense. While certain publishing categories may be more likely to include stories of particular genres than others, it does not exclude those genres from appearing in series aimed at another target demographic. For further discussion, it is necessary to introduce the four main target demographics of manga and the genres discussed in this study.

2.1.1 Target Demographics in Manga

Shounen is the most popular target demographic, packed full of action and humor (Gravett 2005, 56). This claim is supported by a list of best-selling manga maintained and frequently updated on Wikipedia (n.d. a). The list names 23 series that have crossed 100 million copies in sales, out of which as many as 18 are shounen series. Shounen series often feature supernatural powers, heroes and conflict. Gravett (2005, 57) accounts that traditional Western superheroes in full bodysuits have not seen success in Japan, but this has arguably changed after the success of Kouhei Horikoshi's *My Hero Academia* (Japanese title: *Boku no Hero Academia*) that began publishing in 2014 and saw widespread success until its ending in 2024, including 8 anime seasons, videogames and many side stories and spin-offs. Gravett (ibid.) continues by naming robots and aliens as common heroes in shounen series, but especially modern series are certainly not limited to just those options. From Wikipedia's list, two other series from the 2010s include Gege Akutami's *Jujutsu Kaisen* (2018) and Koyoharu Gotouge's *Demon Slayer* (Japanese title: Kimetsu no Yaiba) (2016). Both series feature a main character who is just a regular human at the start of the series yet gains access to powers to defeat supernatural monsters as the story progresses. *Jujutsu Kaisen* is set in the modern day and features all kinds of sorcery reminiscent of Japanese folklore, while Demon Slayer is set in historical Japan and is all about special swordsmanship skills that combine elemental powers with traditional Japanese swords. When discussing popular Shounen series, it would be dishonest to not mention Eiichiro Oda's *One Piece*, which has been serializing since 1997 and is

still ongoing with over 600 million copies sold worldwide, making it the best-selling manga series of all time (Wikipedia, n.d. a). *One Piece* is set in a world of pirates and magical fruits that can give their eater unique superpowers. The series' premise speaks of the late pirate king's treasure known as One Piece, but the series is really about dreams, the journey and the friendships made along the way. Indeed, themes of friendship, effort and success are what shounen is at its core (Gravett 2005, 59).

If shounen series are all about flashy action, it could be said that **shoujo** series are conversely about internal conflict. One might think that shoujo series are just lighthearted love stories, but behind the cute and tender art style are often serious questions about identity, self-expression, family, friendships, aging and death (Gravett 2005, 81). Plot points do not just revolve around teenaged girls and their innocent crushes, but may also feature heavy topics such as bullying, depression, self-harm, sexual orientation, parents' divorce, domestic violence, forbidden love, suicide or even school bombing (ibid.). For example, Ai Yazawa's *Nana* (2000) tells a story about two 20-year-old women who meet by chance and become roommates. The melodramatic story features plenty of relationship drama but is at its core about the two young women and their unique bond that formed despite their different lives and various traumatic events. While shoujo tends to circle around themes of romance and drama, often set in the ever-so-ordinary Japan, this does not automatically exclude fantastical or supernatural elements. A great example of this is Naoko Takeuchi's *Sailor Moon* (Japanese title: *Bishoujo Senshi Sailor Moon*) (1991), which tells the story of ordinary middle school girls that gain the power to transform into magical warriors that fight against evil. Romance is still present in the series, but majority of the plot revolves around saving Earth, largely with the power of friendship and love, and growing from a crybaby to a strong and dependable woman. In the end, shoujo series often feature stories with complex emotions and storylines that can even influence the lives of those who read them (Gravett 2005, 81).

In the Western world, there is a certain expectation that comics are only read by children. At worst, an adult reading comics could be looked down upon. However, this is not the case in Japan (Gravett 2005, 96). Manga was abundantly available for Japanese children, so it only makes sense that among the many who grew up with it, a significant number would still want to consume it as they got older. Of course, publishers were not oblivious to this either, which led to the creation of **seinen** manga, that is, manga targeted at men above the age of 15 (ibid.). Seinen manga targeted especially the typical salaryman: the man who worked an office job in the city and commuted from home to the office on a daily basis, often spending hours in

public transit. When there were no smartphones or other modern devices, what better way to spend those hours than by reading manga, a chapter of which could conveniently be finished in the time it takes for a train to move between platforms (ibid.). Seinen manga could also serve as a fantasy or an escape from reality. Long working hours and interpersonal relationships with coworkers or family members suddenly get a lot easier to tolerate, when you can imagine yourself among the stories of samurai soldiers, athletes, yakuza, murderers, ladies' men, rebels or charismatic lonely wolves – all examples of masculine imagery found in seinen manga (ibid.). In comparison to shounen manga, seinen manga typically feature more mature or darker storylines and more realistically depicted violence, sex or nudity (Johnson-Woods 2010, 89). While men's series flourished, it took longer for the manga industry to pay attention to adult women and their desire for more mature series targeted at them (Gravett 2005, 116). This kind of manga would eventually be referred to as **josei** manga, also known as *redikomi*: ladies' comics (Johnson-Woods 2010, 13). While josei series often depict lives and dreams of adult women (Gravett 2005, 116), ultimately, both josei and shoujo manga include stories that feature the same kind of "psychological, emotional and sexual dimensions layering the experiences of human relationships and gender identity" (Johnson-Woods 2010, 61), which makes them stand apart from shounen and seinen manga.

Now that all four publishing categories have been introduced, there is a need for one clear clarification: the categories are not absolute. In fact, anyone, regardless of gender or age, can enjoy manga intended for any target demographic (with the obvious exception that young children should not read manga that features subject matter unfit for them, like with any other media). Women can be just as entertained by action filled stories as men, and men can enjoy romance stories all the same. For example, Valkama (2026) estimates that roughly half of shounen manga's readers in Finland are girls or women. Similarly, Gravett (2005, 59) argues that the overall message of 'anything is possible, provided that work is put towards it', a key element of shounen, is something that resonates with not just young boys, but adult men as well. Therefore, it would be misleading to claim that shounen manga is only for young boys, and vice versa with the other categories. One could argue that describing these categories almost becomes meaningless, because there will always be one manga series that will not fit neatly into one specific category (Johnson-Woods 2010, 16). However, when describing thousands of different series, it is a blessing in disguise to have some labels to categorize these series with (ibid.). Different target audiences have also influenced each other. Shounen manga eventually assimilated "themes, styles, and techniques from sh[ou]jo manga, which had

developed richer thematic, linguistic, and graphical forms of expression due to its exploration of a wide range of social, cultural, psychological, and ideological themes (e.g., gender issues) imposed upon girls, the intended readers" (Johnson-Woods 2010, 171). Similarly, shoujo manga has learned not only from the humor of shounen manga, but also from three key concepts of shounen: friendship, effort, and success (ibid.).

In Finland, publishers do not typically refer to the original Japanese target demographics, and instead give each series a recommended age bracket, with no mention of gender. Antti Valkama (2020) of Sangatsu Manga recounts that there is no law in Finland that requires them to do this, and that it is merely their consideration for parents and how they should be able to know what their child is reading that motivates the publisher to include said age recommendations. He also highlights that their estimations are conservative, meaning there is not necessarily anything odd about a parent judging that an 8-year-old can read a series that Sangatsu Manga has recommended for 11- to 12-year-olds (ibid.). One might then ask if and how the original Japanese target demographics are of any relevance to Finland's manga scene. After all, by the nature of translation, the target demographic inevitably changes to the target language's speakers, who may or may not represent what the original creators or publishers had in mind. However, I would argue that the Japanese terminology is still of great relevance. Not only is it familiar to manga hobbyists and professionals alike, but the terms are also historically established and continue to be in use to this day. Furthermore, Ivrea, one of the manga publishers in Finland, uses these terms directly on their website as sorting options (Ivrea Suomi n.d. b). It is also interesting to consider how the original target demographics are represented in the choices of Finnish publishers and what that may say of the Finnish audience.

2.1.2 Genres in Manga

As previously mentioned, manga series come in a variety of genres. This chapter aims to briefly describe each genre and name example series from the genres. This study uses the selection of genres listed on MyAnimeList (n.d. a), which have all been defined on the website as well.[1] It should be noted that other sources may categorize or define genres differently, which is why there may be differing opinions on the matter. By and large, genres may and do overlap. Most series fit into at least two genres, but even within those genres there may be

[1] The definitions can be found by clicking each genre, which opens a new tab.

smaller elements inspired by other genres that the series does not quite fit into. Without a further ado, here are the genres, explained based on the definitions listed on MyAnimeList.

As one might guess from its name, **Action** is a genre packed full of action sequences and conflicts revolving around one's physical power (MyAnimeList n.d. a). The genre is especially abundant in shounen and seinen series such as *Demon Slayer* and *Akira* but is also seen in shoujo and josei series like Yuu Watase's *Fushigi Yuugi* (English title: *Mysterious Play*) and Touya Mikanagi's *Karneval*. The overarching plot of action stories may involve one group against another, but the narrative "is always focused on the strengths/weaknesses of individual characters and the effort they put into their personal battles with the opposing group's members" (ibid.).

A genre often seen paired with action is **Adventure**, in which the main character ends up in the middle of unfamiliar situations or lands full of unexpected dangers (ibid.). It may happen because of a specific goal, such as how the main character of *One Piece* wants to become the pirate king, which cannot happen without exploring the seas, or it may happen from a pure chance where the main character is simply struggling to survive, such as the main character of Rumiko Takahashi's *InuYasha* who ends gets abruptly transported five hundred years into the past. In adventure stories, character development is a fundamental factor: how the characters react to sudden events or trials during the journey is at the core of how they experience personal growth or setbacks. The actions and choices made in response to the journey's dangers play a key role in adventure stories. A story that only focuses on travelling through or experiencing foreign lands is not adventure (ibid.).

Comedy may appear as self-explanatory to many. That being said, there is a distinction to be made between comedy as a plot device and comedy as a genre. Nearly every work will have a scene that uplifts the audience with positive emotion or elicits laughter, amusement or general entertainment, but only comedy stories have an overarching narrative focused on evoking amusement (ibid.). In manga, an example of this is *One-Punch Man* by ONE and Yusuke Murata, where the entire plot revolves around an ordinary man who accidentally trained so rigorously that he became the strongest superhero on Earth: so strong that he can defeat any villain in just a single punch.

On the opposite end of the emotional spectrum is **Drama**. These stories are plot driven and focused on realistic characters experiencing real human struggle. The settings or characters may be ordinary, like the high schoolers of Ichigo Takano's *Orange*, or be unrelatable like in

Hajime Isayama's *Titaanien Sota* (Japanese Title: *Shingeki no Kyoujin*, English title: *Attack on Titan*) where the characters, many members of the military, live in a world where human-eating giants known as titans have cornered the last remaining humans to barricade themselves inside large walls. However, the conflicts and emotions depicted in drama stories are often relatable. In these stories, humanity at its worst, best and everything in between will be shown (ibid.).

A genre that could just as well be lighthearted or serious in tone is **Fantasy**. Here you will see magical powers or fantastical creatures that are necessary for the story's narrative. The stories can take place in alternative universes or fictional worlds, such as Hiromu Arakawa's *Fullmetal Alchemist*, or take place on Earth as we know it, such as in Kore Yamazaki's *Velhon Morsian* (Japanese Title: *Mahoutsukai no Yome*, English title: *The Ancient Magus' Bride*), which takes place in modern day England where magic and magical creatures have always existed and are simply invisible to ordinary people who do not have affinity to magical energies. Indeed, there is often a system for magic in fantasy series that explains how some people may or may not be capable of performing it. For example, Kamome Shirahama's series *Witch Hat Atelier* (Japanese title: *Tongari Boushi no Atelier*) has a system where magic is not an innate ability defined at birth, but rather a skill based on drawing symbols that can be learned by anyone who is willing to dedicate years into mastering the craft. Finally, it is important to note that in fantasy stories "fantastical elements cannot be explained by modern science and are commonplace or normal to much of the main cast" (ibid.).

A genre similar to Fantasy, yet capable of standing apart, is **Supernatural**. In contrast to fantasy stories, supernatural stories always take place on Earth yet similarly feature "elements or attributes that are unnatural and unexplainable by science" (ibid.). There are often creatures common in folklore, urban legends or superstitions lurking among humans, such as the paranormal monsters of *Jujutsu Kaisen*. The stories may also feature hidden societies unbeknownst to most humans, such as the vampire society seen in Matsuri Hino's *Vampire Knight*. Humans may also be capable of using supernatural powers: these powers are usually received from inhuman beings or are described as psychic in nature, as seen in Yukinobu Tatsu's *Dandadan*. In contrast to Fantasy, the "supernatural elements may be rumored, but a rational person would be shocked to discover they actually exist" (ibid.).

Contrary to both Fantasy and Supernatural, **Science Fiction** (also known as Sci-Fi or SF) is all about the unreal explained by science. Sci-Fi stories are often set in the future, and feature

topics like humanity's advancement to space, as seen in Makoto Yukimura's *Planetes*, or giant human operable robots, also known as mechs, as seen in Yoshiyuki Sadamoto's *Neon Genesis Evangelion*. Advancements in science are a common topic as well, such as the invention of time travel, as seen in *Steins;Gate* by Yomi Sarachi and Nitroplus. While futuristic topics and themes unite all Sci-Fi stories, the real focus of the stories is often in "the societal or individual [repercussions] caused by the imagined technology or natural phenomenon" (ibid.). Furthermore, Sci-Fi stories are often dystopian in nature. It should also be noted that sufficient world-building is a necessity for a story to be Sci-Fi: an alien visiting Earth alone would only classify the story as supernatural. Like in fantasy and supernatural stories, humans can also have unnatural powers in Sci-Fi stories, but there should always be a plausible scientific explanation for said powers (ibid.).

Supernatural, fantastical or even Sci-Fi inspired elements are no strangers to **Horror**, but the real core of genre is in creating and maintaining a sense of dread in the audience, which may be achieved by "eliciting shock, fear, or disgust through atmosphere and frightening scenarios" (ibid.). Supernatural elements are visible in series like Sui Ishida's *Tokyo Ghoul*, where human eating monsters known as ghouls turn the main character's life upside down, and Sci-Fi elements can be seen in series like Hitoshi Iwaaki's *Kiseijuu* (English Title: *Parasyte*), where parasitic aliens arrive on Earth and take over the bodies and minds of humans. Indeed, mood is of great importance to horror stories and may even take priority over the setting and characterization. Furthermore, the main cast of horror stories are almost always under constant threat of danger. Similar to comedy, horror is also used as a plot device in many series, but only true horror series have an overarching narrative focused on evoking and maintaining apprehension (ibid.).

A genre that may appear similar to Horror on first glance is **Suspense**. These stories instill a sense of anticipation and excitement through a narrative rife with twists, turns and red herrings. Examples include Sakae Esuno's *Mirai Nikki* (English title: *Future Diary*), where 12 contestants are dragged into a death game where each participant has access to a diary that tells the future, and Ohba Tsugumi and Obata Takeshi's *Death Note*, where a model student gains access to a notebook that has the power to kill anyone whose name is written on it, which prompts him to go on killing spree fueled by a twisted sense of justice that would not go unnoticed by the police. In suspense stories, "uncertainty is present every step of the way, often drawn out for maximum effect" (ibid.). Common tools used to keep the readers on edge include withholding important information, intentional misdirection, or even outright

subversion of expectations. Therefore, unlike horror stories, suspense stories leave the readers wanting to know what happens next, rather than fearing it (ibid.).

Featuring a similar narrative full of puzzling circumstances is **Mystery**. These include classic detective stories such as Goushou Aoyama's *Salapoliisi Conan* (Japanese Title: *Meitantei Conan*, English Title: *Case Closed*), where "the main cast willingly or reluctantly become investigators who must work to answer the who, what, why, and/or how of the current dilemma" (ibid.). Unlike suspense stories, mystery stories focus on discovering the explanation and not what will transpire after everything is solved. Mystery stories can also include horror or supernatural elements, such as in *Another* by Yukito Ayatsuji and Hiro Kiyohara, where the main character discovers that a girl in his class is seemingly nonexistent to everyone else, before many of their classmates begin to die one by one in increasingly gruesome ways. In mystery stories, the readers almost always have the same information as the main characters. The narrative typically consists of "collecting evidence, identifying suspects, and theorizing possible scenarios for the unexplainable, before finally capturing the perpetrator or resolving the current situation" (ibid.).

As its name suggests, **Romance** is all about falling in love and the struggles that come about romantic relationships. The genre is popular not only in shoujo and josei series, but also in shounen and seinen alike. Examples include Io Sakisaka's *Aoha Ride* (Japanese title: *Ao Haru Ride*) and Kaoru Mori's *Aron morsiamet* (Japanese title: *Otoyomegatari*, English title: *A Bride's Story*). There may be other subplots mixed in with the romance, but the primary focus is on the main love story. In romance stories, "the narrative focuses on the thoughts and emotions of the characters, illustrating the connections between them and explaining their reactions to events or conflict" (ibid.).

Two genres more unknown to those unfamiliar with manga genres are **Boys Love** (also known as BL, Shounen Ai or Yaoi) and **Girls Love** (also known as GL, Shoujo Ai or Yuri). These stories depict same-sex romantic or sexual relationships between men and women respectively. Like all romance stories, BL and GL "vary in their explicit content levels, with some being more focused on relationship development and others focused more on erotic scenes" (ibid.). On MyAnimeList, series from these genres are always separate from the romance genre. Examples of BL include Natsuki Kizu's *Given*, and examples of GL include Nio Nakatani's *Yagate Kimi ni Naru* (English title: *Bloom into You*).

Another genre more commonly used to describe manga than other mediums goes by the name of **Slice of Life**. In this genre, “stories are focused on a seemingly random and mundane period of the main characters' lives” (ibid.). In other words, the stories are literally a slice of a character’s life. Slice of Life stories typically lack a central plot, which also carries over to a seeming lack of an overachieving conflict and its resolution. Of course, few stories come with no conflict, but in the case of Slice of Life, “conflict appears and dissipates seemingly at will, without a specific narrative to enforce it” (ibid.). Examples include lighthearted series like Kiyohiko Azuma’s *Yotsuba&!* (Japanese title: *Yotsuba to!*), which focuses on the daily adventures of an energetic five-year-old, and emotional series like Inio Asano’s *Solanin*, which tells the story of a college graduate attempting to find meaning in life.

Another genre that one may guess the contents of is **Gourmet.** These are stories focused on not only cooking but also consuming all kinds of dishes and beverages. In this genre, “characters are often chefs or food connoisseurs, and special attention is given to all steps in the cooking process, ranging from detailed descriptions of recipes to the characters' often over-the-top reactions when tasting the finished product” (ibid.). Example series include Natsumi Ando and Miyuki Kobayashi’s *Kitchen Princess* (Japanese title: *Kitchen no Ohimesama*), which follows a girl hoping to achieve her dreams of becoming a pastry chef, and Ryouko Kui’s *Dungeon Meshi* (English title: *Delicious in Dungeon*), which is a fantasy story all about the taboo of cooking and eating monsters that lurk in the depths of a dungeon.

Any sport one could think of has likely seen a **Sports** manga made about it. This is a genre, where “training for and participating in a sport take priority, with the goal of furthering one's athletic abilities – either to win a competition or achieve some social standing” (ibid.). The sport featured may be an individual or a team sport, but “the main cast will always overcome conflict through discussion and insights gained from other athletes or coaches” (ibid.). Therefore, sports stories always feature a sense of collective support and achievement. Examples include Haruichi Furudate’s *Haikyuu!!*, which is all about a high school volleyball team, and Tsurumaikada’s *Medalist*, a heartfelt story about a coach and the little girl he has taken as his student in the nerve wrecking world of figure skating.

Finally, there is a genre known as **Avant Garde**. These stories are “experimental fiction which shunned conventional storytelling at the time it was created” (ibid.). Their narrative is of higher importance than the actual content of the of the series, which is likely why their stories “often invoke unsettled feelings because they reject traditional ways in which we prefer to

view (or escape from) the world" (ibid.). Examples of Avant Garde series include Keiichi Koike's *Ultra Heaven* and Shintarou Kago's *Dementia 21*. However, it should be noted that just because a series is darker, edgier or cynical, it does not mean that it falls under avant garde (ibid).

2.1.3 Translating Manga

Ever since manga came over to the West, translators and publishers have been puzzled with how to approach translating the comics. Comic translation alone poses problems for translators: speech balloons have little space for text, pictures have integrated onomatopoeia and tend to feature culture-specific elements (Jüngst 2004, 85). On top of these common troubles, one of the unique traits of manga is its reading direction: from right-to-left, which appears to Westerners as from back-to-front. Speech balloons in manga also tend to be smaller than their Western counterparts in accordance with the Japanese writing system. The *hiragana* and *katakana* alphabets are syllable based, and *kanji* characters originating from Chinese can contain full words, meaning that Japanese as a language requires less space on paper than English, for example. Moreover, it is not uncommon for Japanese to be written from top-to-bottom, which has resulted in particularly narrow speech balloons (ibid.). As for how these common problems have been tackled with, Jüngst (2004) has introduced a few common tactics throughout her article.

Reading direction is arguably among the traits of manga that has been tackled with the most. For example, a common solution was to 'mirror', 'flip' or 'reverse' panels or entire pages so that the manga series could be read in common Western reading direction: from left-to-right. This was something that early publishers assumed to be mandatory for the Western audience, which often made publishers decide to translate manga that had already been mirrored in a different country (Jüngst 2004, 90). However, this method did not come without its issues. For instance, characters that were right-handed would now appear to be left-handed, leading to a disproportionate number of left-handed characters (Jüngst 2004, 93). Additionally, any text elements in the background would become illegible and require alterations. Another method for tackling the issue of reading direction was to re-arrange the order of the panels themselves, without mirroring the artwork. However, this method would ruin the original page layout, resulting in scenarios where, for example, two characters would now point their guns at each other instead of away from each other (ibid.). Due to these issues, the cost of alterations and the audiences' demands for authenticity, nowadays it is extremely rare for

manga to be mirrored for publications outside of Japan (Jüngst 2004, 91–93). This means that audiences in the West are expected to already know or learn how to read in the original reading direction. At the back of most manga released in the West, is typically a page that briefly explains how to read manga from right-to-left. It typically features an example layout with numbered panels and speech balloons, providing a simple guide for the new reader (Jüngst 2004, 92). For someone unfamiliar with the concept, reading in a different direction than from what you are used to may seem daunting. However, Jüngst (ibid.) notes that especially children have had little to no struggle adapting to the 'wrong' reading direction, which is something that I can confirm from personal experience as well as someone who has read manga from a young age.

Another common source of trouble for manga translators are onomatopoeias, that is, words used for things or actions that imitate natural sounds, such as 'buzz' or 'hiss' (*Merriam Webster Dictionary*, s.v. "onomatopoeia" (n.)). Onomatopoeias are commonplace in Japanese, which naturally makes them a common sight in manga as well (Jüngst 2004, 93). They pose a problem to translators specifically because they are normally integrated into the pictures (Jüngst 2004, 94), similarly to sound effects in Western comics. Jüngst (2004, 94–95) has introduced a few common solutions for tackling with onomatopoeias. The first logical solution translators and publishers came to was to alter the pictures and insert onomatopoeias in the target language. However, retouching is not only a complex, but also a costly process. Therefore, it made sense to reuse retouched manga panels from other Western releases, especially if the manga was to be published mirrored either way. According to Jüngst (2004, 94), this led to certain German translations to feature a mix of onomatopoeias in, at worst, three different languages. Another method is to not alter the pictures, but rather to insert footnotes next to onomatopoeias (ibid.). In my experience, Finnish manga translations tend to replace onomatopoeias with Finnish equivalents where doable (e.g. when they are just words floating in a white void, easy to erase and write over) or insert them next to any onomatopoeias that are closer to calligraphy, integrated into the artwork itself. This is something that Jüngst (2004, 95) notes as well and highlights that the aesthetics of Japanese characters are not something that can be easily matched by translated onomatopoeias in Latin letters. Indeed, due to this and the cost of altering artwork, some publishers choose to leave them unmodified, with no notes or alterations. Lastly, some translations may use a mix of many methods: some onomatopoeias left unaltered, some translated when convenient or required by context, some explained with footnotes (ibid.).

Finally, we can discuss the retouching of the original artwork, which is another method utilized by some manga translations. As noted above, it may be necessary when mirroring artwork or when replacing onomatopoeias, but these are not the only scenarios alterations have been made when publishing manga outside of Japan. Sometimes, it is done to substitute something in the artwork. Jüngst (2004, 97) notes that it is not common to substitute culture-specific elements in manga, no matter if the characters are eating foreign food or partaking in traditional religious activities. Instead, substitution may happen because of legislation. For example, in Germany, printing swastikas is forbidden by law. Therefore, any appearance of them in manga to be published in Germany must be either erased or replaced with another symbol (ibid.). Censorship, morals or decency are other possible reasons for retouching manga. Nyman (2015, 72) accounts the public outcry in Finland in 2003 that followed after parents and media discovered that Akira Toriyama's *Dragon Ball* featured sexual plot points and nudity. This eventually led the publisher to recall all volumes and to later re-release them with a recommended age bracket and retouched artwork that had censored nudity (ibid.).

Lastly, the discussion of manga translation would not be complete without the mention of fan translations. This is a topic that Kati Vanhatalo (2013) has discussed extensively in her master's thesis *Scanlation - the translation of Japanese comics by fans, for fans*. While her thesis is over a decade old by now, it is a great resource for the purposes of this thesis that will not delve deep into fan translation due to time constraints. In summary, it is largely thanks to the fans of manga that showed interest in the comics prior to the 2000s that manga reached the popularity that it has today. They were the ones to alert publishers of the interest by creating fan translations and sharing them on the internet, which helped even more fans to discover the medium (ibid.). Valkama (2024) echoes this narrative from the perspective of the publishers and admits that while it is dubious, without piracy there would have never been an audience large enough in a small country like Finland to sell manga to without the unofficial advertising that came about fan translations. Vanhatalo (2013, 24–26) has discussed the differences between commercial and fan translations, which can be summarized as follows: fans are more concerned about the authenticity of the translations and are often more likely to translate manga more literally. For the same reason, fan translated manga are hardly ever mirrored, nor are their artwork altered. As fans translate for other fans, there is a certain expectation that other fans are already familiar with a lot of cultural references that appear in manga, which is why it is not uncommon for fan translations to even mix Japanese words within the translation, without any footnotes or other explanations in sight. Notably, fan translations also differ

from professional translations on the logistical side: fans may choose to translate whatever they want, whenever they want and however they want, but professional translators act in accordance with publishers and deadlines (ibid.). In conclusion, manga translation and publishing have their roots in fan translation, which likely has influenced the shape that professional translations appear in today as well. After all, I would argue that nowadays, when professional translations are read in the original Japanese reading order and when they leave alterations to a minimum, they certainly resemble more closely a very good fan translation than a heavily altered early professional translation.

2.2 Theoretical Framework

2.2.1 Previous Studies on Manga in Finland

Matteo Fabbretti and Vincenzo Idone Cassone (2025) have presented an overview of academic resources on manga translation available in the English language. Their chapter briefly introduces manga as a medium before arguing that there are three common perspectives that researchers of manga may utilize: sociological, cultural and textual (Fabbretti and Idone Cassone 2025, 363). They conclude that "at present not much information is available in English about manga translation into other languages and cultures" (Fabbretti and Idone Cassone 2025, 370), which this study attempts to address by documenting manga translation in Finland, in English. This section is dedicated to briefly introducing existing research on manga that has been conducted in Finland but is by no means meant to be a comprehensive list of all existing research.

In Finland, previous studies on manga from a sociological perspective are sparse. Outside of the academic sphere, Petteri Uusitalo has written two articles for the Finnish magazine *Anime* regarding the publication of manga in Finland, for which he did bibliographical research similar to the research conducted in this thesis. In 2013, he discussed the 10-year-old history of Finnish manga since its appearance in retail stores. This article highlights major events and manga releases at time. In 2016, he analyzed released manga series by target demographics. Uusitalo concluded that most releases were and will always be shounen series. Having said that, both articles are from a decade ago and lack information about recent events in Finland's manga scene. Furthermore, some statements made in Uusitalo's articles are now obsolete. For example, in 2013 it appeared as if Pauna Media Group had completely vanished from the manga publishing scene, but they would make their return to publish 7 volumes of *Pokémon*

Adventures (Japanese title: *Pocket Monsters Special*) by Hidenori Kusaka, Satoshi Yamamoto and Mato from 2014 to 2015. Additionally, Uusitalo (2013, 15) expressed shame over CLAMP's famous shoujo series having never been translated into Finnish, which would change later that year with the release of the first volume of *Magic Knight Rayearth – Taikasoturit* from Punainen jättiläinen. While some claims have lost their relevancy to time, others made in Uusitalo's articles are still relevant to this day, which is why this study will cross-reference its findings with Uusitalo's.

On a cultural level, Jani Nyman has discussed the history of manga particularly before the 20th century in his thesis *The History of Manga: Japanese Comics, Their History, Evolution, Significance and Selection for Library Collections* (Nyman 2015; my translation). He has also summarized the history of manga publishing in Finland until 2015 and briefly discussed early controversies and censorship of manga in the Finnish publication of Akira Toriyama's *Dragon Ball* (Nyman 2015, 71–73). On the other hand, Pekka Koukkula has conducted a study on not manga itself, but how it has affected Finland's youth in his thesis *Finnish otaku – anime and manga in Finnish youth culture* (Koukkula 2012). He concluded that manga and anime as a hobby has found its place among Finland's youth and shows no signs of disappearing. Studies on individual manga series have also been conducted. For example, PEACH-PIT's *Shugo Chara!* has been analyzed by Jonna Perttula in in her bachelor's thesis *"No matter how much you change, you will always be Amu!" : stages of how teenagers form their identity as seen in the manga series Shugo Chara!* (Perttula 2019; my translation), which also brings a psychological perspective into its analysis. There have also been studies that conducted textual analysis. For example, Suvi Oksanen has written a master's thesis titled *Feminine Characteristics in Japanese : Gendered Language in the Manga Series "Boku no hīrō akademia" ja "Otoyomegatari"* (Oksanen 2020; my translation) and Salla Lindqvist has written a master's thesis titled *"Just According to Keikaku" : Japanese Loanwords in Fan Translations of Manga and Official English and Finnish Translations* (Lindqvist 2023; my translation).

2.2.2 Translating Between Two Peripheral Languages

Johan Heilbron argues that "[t]he international translation system is […] a hierarchical structure, with **central**, **semi-peripheral** and **peripheral languages**" (Heilbron 1999, 433, emphasis added). A central language refers to a language, which "has a larger share in the total number of translated books worldwide" (ibid.). For example, out of all languages, English stands

out as “the most central language in the international translation system” (Heilbron 1999, 434). It can be said that English is in a hyper-central role. Other languages that also have a central role are French, German and Russian. When translations from all four languages are combined, they account for “three-quarters of the total number of translated books” (ibid.). Remaining languages are classified as either semi-peripheral or peripheral. Approximately 6 languages can be classified as semi-peripheral languages and they account for 1–3 percent of translated books, but the line between what is considered a semi-peripheral and peripheral language is vague. Heilbron concludes that “all languages with a share of less than one percent of the world market occupy a peripheral position in the international translation system” (ibid.). Among these languages are Japanese and Finnish. Heilbron (1999, 438) argues that books translated from peripheral languages generally concentrate into very few categories. This study intends to discover whether this applies to translated manga series in Finland as well. However, Heilbron (1999, 440) also admits that the significance of an international system to the understanding of a specific translation practice can be questioned. He continues by explaining that “[t]here is obviously no simple and immediate transition from analysing a world-system to analysing a national publishing industry or particular translation strategies” (ibid.). To build upon his theory of peripheral languages, this study will also consider translational norms in an attempt to encapsulate what the Finnish manga translation and publishing industry is like.

2.2.3 Translational Norms

The theory of this thesis is also based on Toury’s (2012, 81–82) concept of **translational norms**. They influence all kinds of translations and every stage of the translation process, affecting not only translators, but also editors, revisers, publishers, censors, proofreaders and others. Norms may be shared among those who work on the translation or be in odds with others. Crucially, no translation is influenced by only one norm. Toury draws a distinction between **preliminary norms** and **operational norms**. Operational norms refer to norms that direct decisions during the act of translation, whereas preliminary norms refer to decisions that are often made before the actual act of translation even begins. This study does not delve deeper into individual translated works or the act of translating itself. Therefore, preliminary norms are most relevant for the purposes of this study.

Part of preliminary norms is the consideration of **translation policy**, which “refers to those factors that govern the choice of text-types, even of individual texts, to be imported into a

particular culture / language via translation at a particular point in time" (Toury 2012, 82). Toury further explains that different policies "may of course apply to different subgroups, in terms of both text-types (e.g. literary vs. non-literary), medium (e.g. written vs. oral) and human agents and groups thereof (e.g. different publishing houses)" (ibid.). This study will attempt to discover patterns that may indicate the existence of translation policies that publishers of manga in Finland may follow. The second main consideration of preliminary norms is the **directness of translation**. This refers to "the threshold of tolerance for translating from languages other than the ultimate [source languages]" (ibid.). As this study deals with the uncommon language pair of Finnish and Japanese, it is of great relevance to consider what individual publishers think of indirect translations.

3 Material and Methodology

This chapter will introduce the material and methodology of this thesis.

3.1 Material

The primary material of this study is a catalogue built upon Simanainen's (2025) catalogue of manga published in Finland, freely accessible online at Tokio.fi. Permission to use his catalogue as a base for the purposes of this study was acquired via email.[2] The secondary material of this study is an interview conducted with Antti Valkama, the Publishing Director of Sangatsu Manga / Punainen jättiläinen, one of two active manga publishers in Finland. Permission to include the interview in the appendices section of this thesis was also acquired.[3]

3.1.1 The Catalogue

The catalogue of this study functions as shown below in Figure 1: it lists the series' name, author(s), release year, publisher, translator, status, 1 to 4 genres, and target demographic in a spreadsheet.

Figure 1 A screenshot from Excel featuring the catalogue created for this study based on Simanainen's (2025) catalogue.

The spreadsheet has sorting options, which allow for information to be sorted in the desired manner. For example, the spreadsheet can show all series published by one or multiple publishers, volumes sorted by their release year, or everything translated by a particular translator. Filters can also be combined for searches such as all shonen manga volumes released by

[2] Simanainen, personal communication via email, 28 August 2025
[3] Valkama, personal communication via email, 15 March 2026

Sangatsu Manga in the year 2007 and 2008, excluding the mangaka Akira Toriyama. The data can be used to make various graphs that can then, for example, reveal how many volumes of manga each publisher has published in Finland, which years had the most and least volumes published, what target demographics are most catered for, which genres are most and least published, which translators have translated the most manga volumes into Finnish, and other information. The full catalogue can be found in the appendices section of this thesis and is 36 pages long.

As publication of manga is an ongoing process with no end in sight, for this study it was decided to only include manga released in Finland, in Finnish, from 1985 to 2025 – conveniently spanning an exact 40-year-long period. Although this study was finished in 2026, for simplicity it was decided to draw a line at the end of December 2025. Furthermore, any announced yet unreleased series and volumes were not included in this study. This thesis will only focus on manga series that originate from Japan and therefore its catalogue will not include comics labelled as or inspired by manga originating from other counties such as South-Korea, The USA or Finland, even though such comics have been translated into Finnish and published in Finland, notably by Pauna Media Group and Punainen jättiläinen before its acquisition by Tammi. Coincidentally, this distinction resulted in the series *Princess Ai* (Japanese title: *Princess Ai Monogatari*) by Misaho Kujiradou and Courtney Love having its original three volumes to count, as they were released in Japan first (Wikipedia n.d. b), but its sequels would not be counted despite the creators being the same, because they were never released in Japan (Saana 2016).

Over the years, several manga series published by different publishers have also received re-prints, i.e. second editions, that feature the same or only a slightly altered translation from the first edition, credited under the same translator. In this study, these re-prints were excluded from the catalogue to keep the scale of the study in control, and due to lack of easily available documentation on re-printed series. Moreover, as the translations of the re-prints were largely indistinguishable from the previous editions, it was determined that they do not stand apart enough to count towards another entry in the catalogue. Tracking the number of different translations also allows for a more accurate study of individual translators and the number of volumes they have translated, which was another point of interest in this study. Furthermore, a few volumes labeled as special editions have been published. These include, for example, a re-print of the first volume of Yoshihiro Takahashi's *Hopeanuoli* (English title: *Silver Fang: The Shooting Star Gin*, Japanese title: *Ginga Nagareboshi Gin*) published by Punainen

jättiläinen in August of 2011. This edition was otherwise identical to the regular edition, apart from a little stamp on the cover, the inclusion of new colored illustrations and a special message from the mangaka. Special editions such as these were also excluded from the catalogue of this study, as they did not possess a brand-new translation either. On the other hand, in Finland, it is uncommon for a manga series or a volume to receive multiple translations, which is why the creation of another translation is a notable event. Most notably, there was a case where a publisher acquired rights to a series previously published by another publisher in Finland, and a new translation was made. These newly published series, namely ones that were originally published by Sangatsu Manga and transferred over to Ivrea, were considered to be different publications and were therefore listed in the catalogue. Sangatsu Manga and Punainen jättiläinen have also briefly experimented with digital publishing of their series, but as it appeared to be a one-off occurrence and featured series that have been published physically nonetheless (Valkama 2020), the series published digitally were treated similarly to re-prints and thus were excluded from the catalogue as well. In summary, for a manga series or a volume to be listed as an entry in the catalogue created for this study, it had to be 1) published in Finland, in Finnish 2) be of Japanese origin and 3) have a translation created for that specific publication.

3.1.2 The Interview

An interview was conducted with one of Finland's currently active publishers of manga: Sangatsu Manga / Punainen jättiläinen. An attempt was made to contact the other active publisher, Ivrea, as well for an interview, but no reply was received. The interview was chosen to be conducted via email, because analyzing written answers was deemed to be easier and to avoid possible inconveniences that could have come about from scheduling. Questions for the interview were carefully thought over during the first stages of analyzing the data of this study and finalized by February 2026, after which the emails were sent. The emails explained the scope of the study and purposes for the interview, and permission was acquired to attach the questions and answers to the appendices section of this thesis and to credit the answers to Antti Valkama, the Publishing Director of Sangatsu Manga. The questions asked aimed to give context to the findings of the study and give further background information about Finland's manga scene. The interview functions as another primary source and is used throughout the analysis chapter. While the interview was conducted in Finnish, information from the answers was translated when discussed in the analysis. Furthermore, when answers from the interview were referenced, they were cited to Valkama 2026.

3.2 Methodology

3.2.1 Naming Conventions

As a study primarily discussing works of art and authors originating from a country of which culture and language many English speakers are not well-versed in, a few disclaimers are appropriate. First, names of Japanese origin will be in Western order: first name first, last name last. It should be noted that many manga authors, or rather *mangaka*, can go by pseudonyms or can consist of a group of people. There are many series that are written and drawn by separate individuals, but also many where all authors participate in writing and drawing. For simplicity's sake, this study will refer to manga authors as mangaka. When discussing individual manga series, they will be primarily referred to by the title of the Finnish translation. However, the first mention of a specific series will also include its original Japanese title in Latin characters and the title of a possible English release. In cases where titles are the same across all three or two of the three languages, no other titles will be mentioned.

3.2.2 The Status of a Manga Series

A point of interest for this study is the **status** of a translated manga series. This can be either **finished**, **ongoing** or **cancelled**. In this study, for a series to be considered **finished**, it must have concluded serialization in Japan and all its volumes must be translated into Finnish and published in Finland. Next will be the definition of an individual series, specifically what is considered a separate entry on the catalogue. To start off, sequels that began publishing after the original's serialization, feature a different protagonist, or simply have a new (sub)title, are considered separate entries. Certain series, such as Yoshihiro Takahashi's *Hopeanuoli* have sequels, which take place in the same universe, but feature a different protagonist. An example of this would be *Weed* (English title: *Ginga Legend Weed*, Japanese Title: *Ginga Densetsu Weed*) from the same mangaka, which now follows the son of the first series' protagonist. Thus, *Hopeanuoli* and *Weed* are two different entries that are both considered finished. There are also series such as PEACH-PIT's *Shugo Chara!*, which originally serialized from 2005 to 2010 in Japan. Having said that, in 2024, a sequel known as *Shugo Chara: Jewel Joker* that follows the same protagonist, started serializing. *Shugo Chara!* is also considered finished, even though its sequel has not been translated into Finnish at the time of this study's making, presumably because the sequel only started publishing recently and because only three full volumes have been published in Japan so far. *Shugo Chara: Jewel Joker* is an example of an

ongoing series: a series which is currently being serialized. In other words, its story has yet to be concluded. In the context of this study, it refers to series from which at least one translated volume has been published in Finland, but not the very last volume of its series. It is important to note that whether a series is still being serialized in Japan is not decisive. For example, *Hopeanuoli* serialized in Japan from 1983 to 1987, meaning that it was in all likelihood finished by the time a decision was made to translate it into Finnish. When it serialized in Finland from 2010 to 2011, it was considered an ongoing series. Currently, the publishing house Ivrea is planning on publishing a new translation of the series (Anime 2024b), in which case the series, specifically Ivrea's new edition of it, would once again be classified ongoing as soon as the first volume is published. In other cases, series such as Kiyohiko Azuma's *Yotsuba&!* (Japanese title: *Yotsuba to!*) have been classified as ongoing since 2003 in Japan, 2008 in Finland, because the original series is still serializing in Japan and because its publisher in Finland is still actively releasing every volume. Finally, when all volumes have been successfully published, a series is finished. However, when this does not happen, a series is considered **cancelled**. These are series, which for one reason or another were abandoned by the publisher and left unfinished, without a complete translation. Notably, all series under the publishing house Egmont Kustannus that were still ongoing in 2013, were cancelled when the publishing house stopped all publication of manga series in Finland that same year (Valkama 2024b). Finally, there are three series which this study has given two statuses to: *My Hero Academia* by Kouhei Horikoshi, *One Piece* by Eiichiro Oda, and *One-Punch Man* by ONE and Yusuke Murata are all both ongoing and cancelled in this study's dataset. This was decided upon, because all three series have two different translations published by Sangatsu Manga and Ivrea respectively. To summarize, Sangatsu Manga lost its publishing rights to the three series, which were then picked up by Ivrea (Valkama 2024a). Therefore, it can be argued that the Sangatsu Manga translations were cancelled. Ivrea not only continued the series from the next volumes, which were yet to be published in Finland, but also began publishing said series from volume 1 onwards, which featured a brand-new translation from a different translator. These new Ivrea publications are still ongoing.

3.2.3 Genres and Target Demographics

The genres and target demographics to be considered for this study were largely taken from metadata listed on MyAnimeList, a website which features a huge database of Japanese media. In alphabetical order, genre options listed on the website are **action**, **adventure**, **avant garde**, **award winning**, **boys love**, **comedy**, **drama**, **fantasy**, **girls love**, **gourmet**, **horror**,

mystery, **romance**, **sci-fi**, **slice of life**, **sports**, **supernatural** and **suspense** (MyAnimeList n.d. a). Detailed explanations of the genres can be found in chapter 2.1.2. This study omitted award winning from its catalogue, as it was determined that rather than describing the story or themes of a series, being "award winning" speaks more of the reception and fame of a particular series, which was considered to be outside the scope of this study. Furthermore, it should be noted that, on MyAnimeList, some series were tagged with more than 4 genres. In cases like this, some were left out to keep the scale of the study in control. For example, if a series was tagged with both fantasy and supernatural, two similar genres that can easily overlap, the one that least fit the synopsis was left out. In cases where there were no genres assigned to a particular series, typically a niche one-volume release, a genre was assigned based on the synopsis.

Data on target demographics was also taken from MyAnimeList and consist of five categories: **children**, **shounen** (boys), **shoujo** (girls), **seinen** (young adult men) and **josei** (women), which are all presented by Fabbretti and Idone Cassone (2025, 362) as well. Detailed explanations for the categories can be found in chapter 2.1.1. 19 out of 230 series, or roughly 2.3%, had no specified target audience, i.e. they had not been serialized in a magazine or the magazine they were serialized in did not have one specific target audience. In these cases, a target audience was determined based on the Finnish release's recommended age bracket, the series' synopsis, or other clues, such as the target demographic of the mangaka's other series. In other words, it is possible for the catalogue's data to contain errors, but they should not be large enough to affect the conclusions of this study.

3.2.4 Research Process

The research began by creating the catalogue of this study and by conducting research on publishers of manga in Finland from their homepages, social media, academic sources, magazines and blog posts discussing the Finnish manga scene. The catalogue was created from scratch in Microsoft Excel. Series and volumes to be included were decided upon according to the criteria explained in 3.1.1. Information, especially concerning which series have been published in Finland, by which publisher and when, was transferred over from Simanainen's catalogue. Any missing information was expanded upon with information from the website MyAnimeList. Similarly, existing information was cross-referenced, and information not included in Simanainen's catalogue, notably target audiences, was sourced from MyAnimeList as well. The other major addition to Simanainen's catalogue, translators of individual volumes or

series, were sourced from the Finnish National Bibliography known as Fennica. It should be noted that both databases utilized in this study may contain incorrect data, which is why this study made sure to cross-reference information across both databases. A third information source was also used for cross-referencing: another hobbyist's list of manga published in Finland from the website Doki Doki (Saana 2016). This list was useful for also containing information about translators, source languages and reading direction. In cases where inconsistencies were discovered, further research was done by, for example, acquiring and examining the manga volumes in question directly. A notable case of this was Ivrea's publication of the series *Deadman Wonderland* by Kazuma Kondou and Jinsei Kataoka, which credits J.J. Pensikkala for the translation of volumes 1, 2 and 4–13. Curiously, Emma Myllynen was credited for the translation of volume 3, which seemed unusual, as the pattern so far appeared to be that one translator would handle a series by themselves, or another translator would take over for the duration of the remaining series. Upon examining the actual volume, Myllynen was indeed credited for the translation, which confirmed that the information on Fennica was correct in this case. Furthermore, information regarding the status of a series was largely taken from Simanainen's catalogue, but the status of every series labelled as 'ongoing' or 'cancelled', was verified from other sources, such as comments made by the publisher. If no information was found and no new volumes of the series had been published for over 5 years, a series was considered cancelled. Finally, while utmost care was put into cataloguing data into the spreadsheet, there is always the possibility of human error resulting in inaccuracies.

Once the catalogue had been finished and data became visible, email interviews with publishers could be conducted based on finalized questions that arose during the making of the catalogue and after the data was looked at. Emails containing the interview questions and information about the study were sent to both Sangatsu Manga / Punainen jättiläinen and Ivrea, but unfortunately no reply was received from Ivrea. Sangatsu Manga / Punainen jättiläinen's answers, however, were received and were used as an additional information source that could support the thesis. Simultaneously, data from the catalogue was analyzed in detail by creating various graphs, comparing their results and making conclusions based on findings. Finally, the data resulting from the catalogue and answers from the interview were considered together, and final conclusions were made.

4 Analysis

4.1 Contextualization of the Bibliographical Analysis: Publishers of Manga in Finland

This section will briefly introduce the 7 different publishing houses that have each published at least one volume of manga in Finland. Knowing each publishing house's history with manga will give important context to the results of this study. In summary, Jalava and Like were the first publishing houses to try their shot at publishing manga in Finland, but in the end neither continued publishing manga after their first attempt. The early 2000s brought in Sangatsu Manga and Egmont Kustannus, who would rise to be the biggest publishers until early 2010s, when Egmont Kustannus moved away from publishing manga and left manga publishing on Sangatsu Manga's shoulders. Punainen jättiläinen attempted to freshen the scene and later became Sangatsu Manga's sub-brand. Pauna Media Group was around for some years, publishing a few oddities every now and then. Lastly, Ivrea's presence on Finland's manga scene has been questionable: the publisher has disappeared 3 times within the past 20 years, having recently renewed its motivation and increased activity. At the end of 2025, Sangatsu Manga, Punainen jättiläinen and Ivrea are the only active publishers of manga in Finland.

4.1.1 Paving the Way: Jalava and Like

The history of Finland's manga publishing begins in the 20th century, when **Jalava** would become the first ever publishing house in Finland to publish manga with its release of Nakazawa Keiji's *Hiroshiman poika* (Englist title: *Barefoot Gen*, Japanese title: *Hadashi no Gen*) in 1985. Jalava is publishing house based in Helsinki that was founded in 1982 by Markku Jalava (Art House n.d.). However, *Hiroshiman poika* would never be released in its entirety, as Jalava would only ever release two of the total ten volumes. Furthermore, the second volume would be released in 2006, decades after the first one. Jalava also published a reprint of the first volume that same year. Curiously, the first and second volume also differ in their release format: the artwork of the first volume is mirrored, while the artwork of the second volume was left untouched (Laine 2006; Saana 2016). Valkama (2024) suspects that *Hiroshiman poika* was not translated directly from Japanese. However, *Hiroshiman poika* was translated by Kaija-Leena Ogihara, who, upon searching her name on the Fennica database, appears to have translated other works originating from Japan as well. Her surname also appears to be of Japanese origin, leaving this study to believe that *Hiroshiman poika* was translated directly

from Japanese to Finnish. Furthermore, Saana's (2016) list of manga translated into Finnish claims *Hiroshiman poika* was translated directly from Japanese.

The second publishing house to test the waters and release manga in Finland was **Like** with its release of Otomo Katsuhiro's *Akira* in 1995. Like is a Helsinki-based publishing house founded in 1987 that became a part of the Otava Group in 2006 (Like n.d.). Like would release up to 8 volumes of *Akira* at a slow pace until 2003, after which all the volumes would be reprinted in 2006. The remaining 4 out of 12 total volumes received their translations that same year. Similarly to *Hiroshiman poika*, Valkama (2024) also suspects that *Akira* was an indirect translation, which is likely accurate. Volume 1 was translated by Eija Niskanen and Ilari Seppä, volume 2 by Mika Seppälä, and volume 3 onwards by Juha Ahokas. Curiously, Saana's (2016) list suggests that the first volume was translated from both Japanese and English, and that the remaining volumes were all translated from English. Upon searching every translator's name on Fennica, no other titles that were originally in Japanese were found.[4] Therefore, this study concludes at least 11 of the 12 volumes are presumably indirect translations. To conclude, Jalava's release of *Hiroshiman poika* appeared to be just an oddity, which was left unfinished. Like, on the other hand, would release *Akira* until the end, but did not pursue other manga series afterwards. Jalava and Like may not be so relevant in comparison to the other publishers that would soon dominate the scene. However, they both are undoubtedly an important part of the history of Finland's manga market.

4.1.2 Veterans of the Scene: Sangatsu Manga and Punainen jättiläinen

As the 21st century rolled in, a real manga boom in Finland could finally begin with the publication of the very first volume of the Finnish translation of Akira Toriyama's *Dragon Ball* in April 2003. The first four volumes would be published under Kustannus Kolibri, which was a company owned by Tammi Publishers, practically a branch of it (Valkama 2024b; Valkama 9 March 2023). Soon enough, Kustannus Kolibri would be assimilated into Tammi and disappear, which led to the creation of a new brand under Tammi called **Sangatsu Manga** that would focus solely on publishing manga series (ibid.). Tammi is a Finnish publishing house founded in 1943, but around the same time as manga publishing began, it was purchased by a Swedish media conglomerate called Bonnier. Later, Bonnier would purchase another old

[4] Searches were made in the database on 30 March 2026 using the following filters: Language of Original Work: Japanese, Language: Finnish. Next, the following names were searched one by one: Ilari Seppä, Eija Niskanen, Mika Seppälä, Juha Ahokas.

Finnish publishing house called WSOY. At first, Tammi and WSOY continued to be separate entities, but they would eventually be merged and form Werner Söderström Oy. Nowadays, although under the same company, both Tammi and WSOY still function as separate brands functioning similarly to independent publishers. Sangatsu Manga was another of these brands under Werner Söderström Oy (Valkama 9 March 2023).

In Tampere, in 2005, Antti Grönlund and Minna Haverinen established **Punainen jättiläinen** [The Red Giant] as a publishing house specializing in Korean and Japanese comics. Its first published manga was *Princess Ai* by Misaho Kujiradou and Courtney Love. It would continue to publish five different manga series as an independent publishing house until 2009, when it was purchased by Tammi and became a sub-brand of Sangatsu Manga (Sangatsu Manga n.d.; Valkama 9 March 2023). Since then, a distinction was made for series for younger audiences to be published under the Sangatsu Manga brand, and series for older audiences under the Punainen jättiläinen brand (Sangatsu Manga n.d.). Later, Antti Grönlund would leave Tammi in 2011 (Uusitalo 2015, 28).

In 2023, a major change arrived. Both Sangatsu Manga and Punainen jättiläinen would change ownership from Tammi to H-Town, who would take over the manga publishing business (Valkama 2023). Further reasonings were not disclosed, but Valkama would briefly explain that Tammi would have either had to stop manga publishing in its entirety or choose to heavily invest in it (Valkama 10 March 2023). In the end, they chose to transfer the manga publishing rights to H-Town. In Finland, H-Town is known for publishing the *Anime* magazine (Valkama 2023). Despite the major change, things would continue relatively same as before: the people who worked on the manga publishing process (The Publishing Director and freelancers: translators and editors) would continue to work on their tasks as usual, just under a different company. An unfortunate change that came with the change was an increase to the prices of individual manga volumes. However, this was inevitable due to increased costs of printing and shipping (Valkama 2023). What was not expected, was what happened next: during the transition, Sangatsu Manga was denied publishing rights for continuing some of their series, because the rights holder Shueisha had decided against it, instead opting to hand them over to Ivrea, who was making a comeback into the Finnish Market (Valkama 2024a). The same did not happen with other rights holders from Japan, who Sangatsu Manga successfully negotiated with. Valkama suspects that Shueisha, unfamiliar with the details of Finland's manga market, simply must have thought that a bigger, international publishing house, must be more trustworthy (Valkama 10 June 2024).

Sangatsu Manga is notable for being the largest publisher of manga in Finland, with 95 different series under their name. They are the only publisher to have consistently released manga in Finland since they started in the business. Sangatsu Manga's publications are also notable for never having been mirrored, with *Dragon Ball* being the first ever manga to be published unmirrored in Finland (ibid.). Furthermore, Sangatsu Manga is the only publisher in Finland to have always translated their Japanese series directly from Japanese (Valkama 2026). According to Valkama, the publishing house never had a lack of translators that knew Japanese, so the thought of translating from another language never even crossed their minds. Moreover, he believes that an indirect translation would only alienate the reader from the source material (ibid.). Punainen jättiläinen is similarly notable for having published 62 series. Together, the brands have 157 series under their name. Today, Sangatsu Manga and Punainen jättiläinen are based in Helsinki, and their Publishing Director is Antti Valkama (Sangatsu Manga n.d.). Valkama has been a part of Sangatsu Manga's journey since the very beginning: he was first hired as a freelance translator and worked on *Dragon Ball*'s translation alongside his brother Heikki Valkama (Hämeen Sanomat 2004; Valkama 2026). In 2006, he was hired to work full-time not only as a translator, but also to work on various other publishing related tasks (Valkama 2026). Both Sangatsu Manga and Punainen jättiläinen intend to continue publishing manga for the foreseeable future, although in a slightly smaller scale than before due to their current owner, H-Town, being a smaller company than their previous owner Tammi (ibid.).

4.1.3 Old Friend, Long Gone: Egmont Kustannus

Soon after Sangatsu Manga, **Egmont Kustannus** [Egmont Publishing] would also enter Finland's manga scene in 2003 with the release of Rumiko Takahashi's *Ranma ½*. Egmont Kustannus is also notable for being the first publisher to bring shoujo manga, i.e. manga targeted at young girls, to Finnish audiences in 2005 with Arina Tanemura's *Time Stranger Kyouko* (Anime 2013). However, unlike Sangatsu Manga, Egmont Kustannus left Finnish manga translation behind in 2013, when the publisher ceased all publication of manga (Anime 2013). In 2011, Egmont Kustannus had already shown signs of decline by cancelling *Hirviöprinsessa Hime* (Japanese title: *Kaibutsu Oujo*, English title: *Princess Resurrection*) by Yasunori Mitsunaga and *Oh! My Goddess* (Japanese title: *Aa! Megami-sama!*) by Kousuke Fujishima. A representative of Egmont Kustannus commented on the matter, claiming that the company assigned over half of their employees working on manga to work on other tasks (Tokio.fi 2011a). This was apparently due to criticized high prices of their manga volumes.

The representative also mentioned that releasing new series would be risky, which is why the company only had plans to continue ongoing series at the time (ibid.). In the end, it only took two years for Egmont Kustannus to cease all manga publishing in Finland. The end of Egmont Kustannus' manga publishing was set in stone with the cancellation of Goushou Aoyama's *Salapoliisi Conan* and Rumiko Takahashi's *Rinne* (Japanese title: *Kyoukai no Rinne*) in late 2013 (Anime 2013). During Egmont Kustannus' 10 years of publishing manga in Finland, they published a total of 25 different series spanning a total of 423 volumes.

In 2021, Egmont Kustannus would change its name into Story House Egmont (Egmont 2021). For simplicity, the publisher is referred to as Egmont Kustannus within this study, as those familiar with Finland's manga scene would be more familiar with the old name. Furthermore, as the Egmont that exists today is no longer involved with publishing manga in Finland, it might cause confusion to refer to the publisher by their new name. Story House Egmont is known for publishing comics, magazines, books and more (Story House Egmond n.d.). The company has two owners: Finnish Sanoma Media and Danish Egmont. Indeed, Story House Egmont is part of the Egmont Group, a large Nordic media company that operates in over 30 countries (ibid.).

4.1.4 Riding the Wave: Pauna Media Group

Pauna Media Group was a company founded by Jari Pauna in 2007 (Alma Media Group n.d.; Brill 2011). Their manga and manga-styled comics would begin appearing in Finnish retail stores the very same year. In fact, Lakoma (2014) accounts that their comics were never sold at bookstores and were only available at retail stores. From 2007 to 2010, Pauna Media Group would release a total of 8 different manga series but quietly disappear from the scene soon afterwards. The series represented a variety of genres and did not target one specific audience. In fact, it appeared as if Pauna Media Group was shooting their shot and offering something for everyone. The one thing in common with all series was their association with the American manga publisher TOKYOPOP, which is apparent from the covers of all volumes where logos of both Pauna Media Group and TOKYOPOP were visible. Furthermore, all of Pauna Media Group's manga translations appeared to have been translated from English, not Japanese (Saana 2016). Therefore, it can be theorized that Pauna Media Group likely acquired their manga licenses from TOKYOPOP. Pauna Media Group is also notable for publishing a large number of manga-styled comics that did not originate from Japan (Lakoma 2014). These so-called 'pseudomanga' are known to imitate manga art styles, but they may

also try to replicate manga by including Japanese characters or by following a right-to-left reading direction, despite the printing norms of their origin country (Jüngst 2004, 100). Many of these pseudomangas that Pauna Media Group translated were first published by TOKYOPOP (Lakoma 2014).

To the surprise of Finland's manga readers, Pauna Media Group would return in 2014 to publish one more manga series: *Pokémon Adventures*, bringing the total number to 9 released series (Uusitalo 2015, 28). This was initiated by Antti Grönlund, who had wanted to give manga publishing another try after he had left Punainen jättiläinen in 2011. Publishing *Pokémon Adventures* in Finnish was his idea, which Pauna Media Group stepped in to fund. Unlike the company's previous publications, this time the series would be translated directly from Japanese. This ended up delaying the project, as the rights holder The Pokémon Company International (TPCI) ended up being very particular about how the series' terminology was translated. Furthermore, the series was first translated based on the original Japanese publication, but TPCI later informed that every sound effect should be translated as well (ibid.). As discussed by Jüngst (2004, 94), translating sound effects or onomatopoeias is a costly and time-consuming process. Likely due to this, Pauna Media Group ended up using the already altered pages of the English release of the manga, published by VIZ Media. However, as TPCI's guidelines had become stricter over the years, some altering was still necessary. In the end, the series ended up releasing at a pace closer to one volume every three months than the initial plan of monthly releases (Uusitalo 2015, 28). Pauna Media Group's initial plans included releasing the first story arc of the manga, totaling 7 volumes, and any further releases were still up in the air. Grönlund would have liked to publish even more volumes of the series (Uusitalo 2015, 29), but 10 years later it is apparent that no further volumes were ever published. In fact, Pauna Media Group would cease their operations in 2016 (Alma Media Group n.d.). Their websites, manganet.fi and pmg.fi, no longer work and can only be accessed via Internet Archive's Wayback Machine. It should also be noted that *Pokémon Adventures* was never advertised on manganet.fi, which could signal that the website was long forgotten by the time Pauna Media Group returned for *Pokémon Adventures*.

4.1.5 Testing the Waters, Diving in: Ivrea Suomi

In 1997, a publishing house known as Editorial Ivrea was founded in Argentina by Leandro Oberto and Pablo Ruiz (Wikipedia n.d. c). A decade after in 2008, the same publishing house would make its first appearance in Finland (Tokio.fi 2008; Uusitalo 2014, 14). The Finnish

branch would later be known as **Ivrea Suomi**, and its first published series were Takehiko Inoue and Eiji Yoshikawa's *Vagabond* (1998) and Nobuyuki Anzai's *MÄR* (2003). On top of Finland, Ivrea has published manga not only in Argentina, but also in Spain and Chile (Tokio.fi 2008; Wikipedia n.d. c). However, Ivrea's first few years in the Finnish market were not so consistent. Ivrea would take a year and a half long break from publishing in 2010 but returned the next year with new licenses (Tokio.fi 2011b; Uusitalo 2014, 14). In an interview conducted by Uusitalo, Leandro Oberto claims this happened because at the time, a large shareholder left Ivrea. Discussions about the strategy for Finland's market with their successor took months to complete, during which publishing was paused (Uusitalo 2014, 14). He also claims that from 2008 to 2011, Ivrea struggled due to bad production management and from the bursting of the manga bubble. During their next era, from 2011 to 2013, Ivrea's mission was to learn more about Finland's manga market, before they could commit to a renewal (ibid.). What followed was another quiet period for the latter half of 2013, but this would come to an end with an announcement for Ivrea's grand return in 2014 with large changes to the format of their publications: volumes would now come with removable dust jackets, and the translations would be made directly from Japanese (Tokio.fi 2013; Uusitalo 2014, 14). Things looked good for some years again, until 2021, when Ivrea would once again disappear, taking the longest gap in-between activity until its recent return in 2024 (Anime 2024a). Tommi from Ivrea Suomi would explain this gap in reply to a comment on Ivrea's website: at the time, there was a huge boost in the popularity of manga worldwide, which is why all of Ivrea's resources were poured into Spain and South-America's manga markets during those years (Tommi 18 February 2024). In another reply, he reassures another commenter that this time Ivrea has come to stay, because the company has expanded its resources and because they now have more funding (Tommi 9 April 2024). Only time will tell if Ivrea can keep up a consistent release schedule for multiple years.

It is also worth noting that in its current era, Ivrea has chosen not to follow the tradition that other manga publishers in Finland established in 2003: publishing manga in retail stores. Tommi from Ivrea explains that the last time they attempted it, it brought massive losses to the company, because of a practice where unsold volumes would be recycled as soon as new volumes came in to replace them. He continues by mentioning that instead, their publications can be purchased from bookstores, comic stores and their own webstore (Tommi 19 August 2024). Furthermore, in another comment he highlights that this strategy will also allow them to sell series from all sorts of genres that could feature content that might not be tolerated by

the distributor for retail stores (Tommi 4 September 2024). In other words, these series could not be sold in retail stores without alterations, which goes against Ivrea's commitment to keeping releases as authentic as possible. This is a rhetoric that Ivrea has sworn by since their reform in 2014 (Uusitalo 2014, 14). Indeed, Oberto highlights that Ivrea's goal is to release publications so good that Finnish readers would have no reason to pick a series' English translation instead, when the Finnish edition is at least as authentic, if not better, but also cheaper than its equivalent in English (Uusitalo 2014, 16). Leaving retail stores behind is a strategy that did not come from nowhere. In fact, Ivrea already experimented with it for the releases of Mayu Shinjou's *Love Celeb* from 2009 to 2013, which likely could not have been published in Finnish retail stores uncensored. The series was first distributed through Fantasiapelit, a Finnish store specializing in tabletop gaming and comics (Uusitalo 2014, 15). Another strategy that makes Ivrea stand out is their idea that popular series likely have a reason for their popularity, which makes them worth translating to different audiences. Antti Valkama of Sangatsu Manga, for example, has claimed that the popularity of a series affects sales in Finland surprisingly little, because a notable number of manga buyers are simply casual readers rather than hobbyists (Uusitalo 2014, 16). This is very apparent from the series that Ivrea has published in their current era as well. Their current roster is full of household name manga such as *One Piece*, *Demon Slayer*, and *My Hero Academia*, which are all best-sellers worldwide (Wikipedia n.d. a). Today, Ivrea Suomi is the only publisher alongside Sangatsu Manga and Punainen jättiläinen to publish manga in Finland.

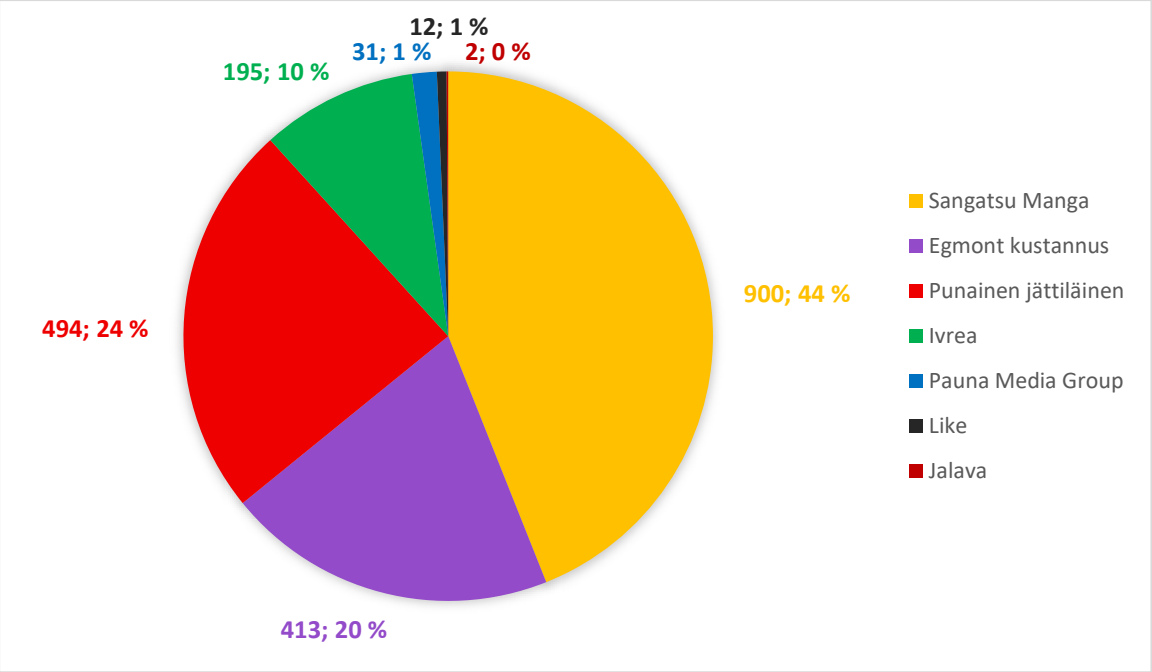
4.2 Bibliographical Analysis

In this section, data from the catalogue created for this study will be analyzed and visualized in various charts and figures. Findings will be presented throughout the section. The first chapter goes over general findings and looks at the bigger picture, the second chapter delves deeper into the data by analyzing target demographics and genres, the third chapter discusses translators and translations, and the final chapter sums up which mangaka and manga have been most published in Finland.

4.2.1 Manga Releases and Publishers Over the Years

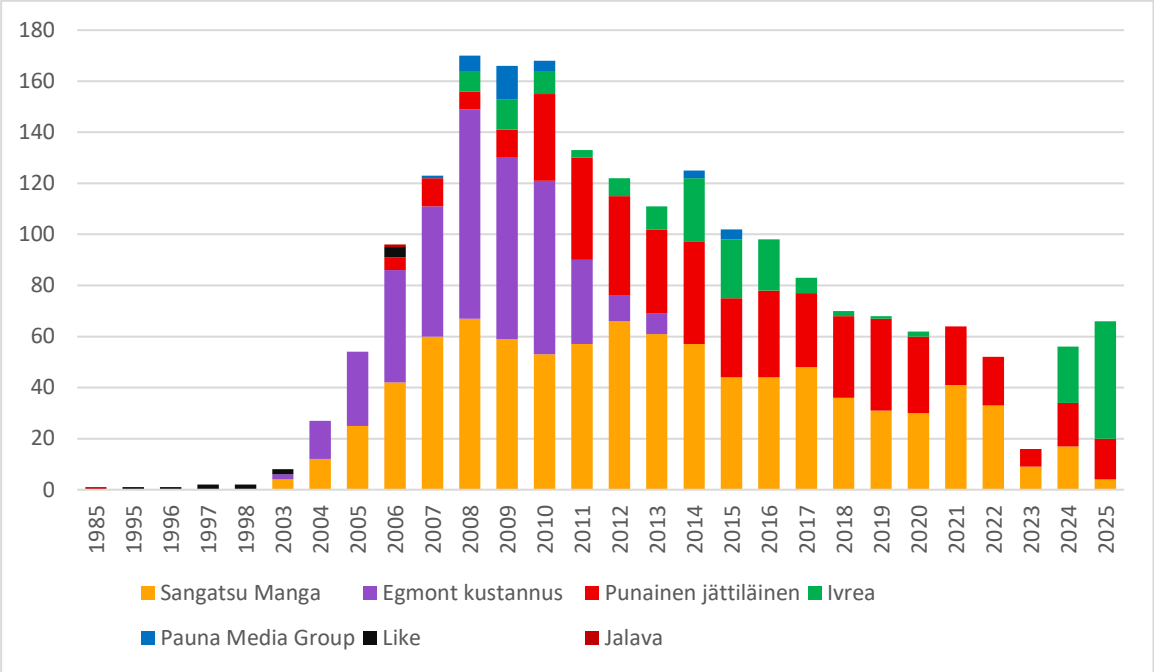
Below is Figure 2, a pie chart that depicts all publishers and the amount of individual manga volumes they have published from 1985 to 2025.

Figure 2 Number of volumes published and their percentage by publishers



In total, this study found that 233 different manga series and 2047 total individual volumes of manga have been released in Finland within said timeframe. Out of these volumes, the largest portion was released by Sangatsu Manga with exactly 900 volumes in total, or roughly 44% of all volumes. The second most was released by Punainen jättiläinen with 494 volumes, roughly 24%. Other large chunks are taken by Egmont Kustannus with 413 individual volumes amounting to roughly 20%, and Ivrea, 195 volumes taking up 10% of all releases. In the future, Egmont Kustannus's share is likely going to diminish and Ivrea's grow larger, as Egmont Kustannus no longer publishes manga in Finland and Ivrea has increased their output in recent years, which is evident when observing Figure 3 on the next page. Pauna Media Group, Jalava and Like are also likely to disappear from the chart, as they all account for only 2% of published manga in Finland. Furthermore, as Sangatsu Manga and Punainen jättiläinen are two brands under the same company, it could be said that 68% of all manga released in Finland has been released by one major publisher. However, to see the full picture, it is beneficial to observe released manga volumes over the years, as shown on the next page in Figure 3.

Figure 3 Manga releases by year and publisher



Spreading all released manga volumes over years reveals that manga publication in Finland has had some interesting developments. The middle of the graph clearly shows that there was a major boom near the end of the 2000s. 2008 came on top with the most manga releases per year, totaling 170 volumes, which was only two volumes more than 2010 with 168 volumes, although 2009 with its 166 volumes did not fall far behind the two largest years either. During these peak years, there were 5 active publishers: Sangatsu Manga, Egmont Kustannus, Punainen jättiläinen, Ivrea and Pauna Media Group. Figure 3 also shows that Sangatsu Manga has been publishing manga in Finland for the longest out of all other publishers. They started publishing in 2003 and are still publishing to this day, which amounts to over 22 years. While Punainen jättiläinen has been publishing since 2006, it is important to note that they were not bought by Tammi until 2009. Their publications as an independent publishing house were much smaller in number, totaling 34 volumes by the end of 2009. Therefore, 460 of Punainen jättiläinen's published volumes were as a companion to Sangatsu Manga, and therefore the two's publications together more realistically amount to roughly 67%, which is still over two thirds of all manga published in Finland.

However, Figure 3 also reveals that while Sangatsu Manga and Punainen jättiläinen have had a strong presence since their appearance, they only dominated the scene near the end of the 2010s and from roughly 2018 to 2022. This can be largely attributed to the disappearance of other publishers. The graph reveals that Egmont Kustannus was Sangatsu Manga's equal until its disappearance in the early 2010s, to this day holding the record of most manga volumes

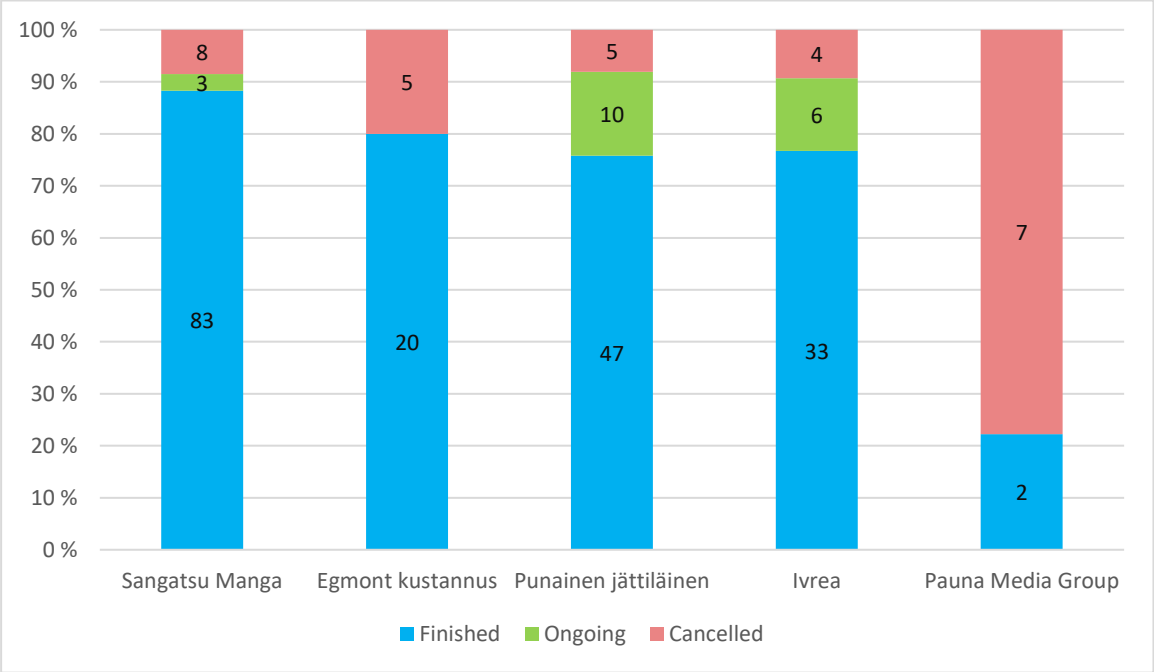
released by one publisher in a year, that being 82 volumes in 2008. At most Sangatsu Manga released 67 volumes that same year, but they would also release 66 volumes in 2012. However, if we combine Punainen jättiläinen's 39 volumes released that same year, that brings the two's total to an impressive 105 volumes a year, after the boom was supposedly over. It can therefore be concluded that Sangatsu Manga and Punainen jättiläinen started dominating the scene largely due to Egmont Kustannus' disappearance. Ivrea's fickle presence in Finland's manga scene is also apparent from their published volumes. While they reportedly took a break between 2010 and 2011 (Tokio.fi 2011b; Uusitalo 2014, 14), it is not immediately clear from Figure 3 alone. However, the catalogue itself reveals that all series but one started before 2010 would be cancelled that same year. *Kekkaishi, Mär, Olipa kerran… Me* and *Vagabond* all had their last volumes released in 2010, three of those releasing in June (Simanainen 2025). *Love Celeb*, on the other hand, survived and was eventually finished. Out of the 3 volumes published in 2011, one was *Love Celeb's* 4th volume in November, and the other two were brand-new licenses, also released in November (ibid.). 2014 would also be a notable year for Ivrea's publications. Following the announcement of Ivrea's renewed activities for 2014 and onwards (Tokio.fi 2013), 2014 to 2016 would see a record number of volumes from the publisher, until the number dramatically decreased in 2017. No new series came and Ivrea would slowly finish its existing series until it disappeared from the scene yet again after 2020. These disappearances left Sangatsu Manga and Punainen jättiläinen to dominate the market. Finally, the graph shows Ivrea's grand return in 2024, with as many volumes released as its peak years in the mid-2010s, and a surprising doubling of that number in 2025. 2023 stands out in the graph as well. The measly 16 volumes released for an entire year can be largely attributed to Sangatsu Manga and Punainen jättiläinen being in the process of changing owners from Tammi to H-Town in 2023 (Valkama 2023). Furthermore, their lack of releases in the following years can also be attributed to Ivrea acquiring the rights to three of their long-running series: *My Hero Academia* by Kouhei Horikoshi, *One Piece* by Eiichiro Oda and *One-Punch Man* by ONE and Yusuke Murata. In practice, this reduced the number of series that Sangatsu Manga and Punainen jättiläinen could and likely had planned to publish. Furthermore, Valkama (2026) accounts that as a company, H-Town is smaller than their previous owner Tammi. The smaller resources have resulted in Sangatsu Manga and Punainen jättiläinen to release less new series (ibid.).

It should be noted that numbers for yearly releases counted in this study did not perfectly align with the studies conducted by Uusitalo in 2013 or 2016. For example, his study from

2016 claims there were 169 releases in 2008, 159 in 2009 and 165 in 2010. Meanwhile, the study from 2013 claims that over 200 individual volumes were distributed to Finnish retail stores in 2008. As the results of Uusitalo's studies are crammed into two-page layouts of a magazine, the articles are very concise and do not reveal how the data itself was acquired. Without having access to the data of all studies, it is impossible to say why the numbers differ as much as they do. Perhaps the number 200 of Uusitalo's 2013 study includes pseudomanga or re-releases, as his 2016 study does specify that pseudomanga and re-releases were, in fact, not included. Perhaps there are errors in whatever database was used to acquire information for all three studies. This study did its best to verify its data and therefore believes its numbers are accurate. In the end, the margin of error is still small enough to not affect the overall conclusions of the study.

Lastly, this study would like to discuss the current state of all publishers. Below in Figure 4, the five publishers who have all published more than one series of manga are present. Not shown on the chart are Jalava and Like. Like's publication of *Akira* was finished. On the contrary, Jalava never released more than 2 volumes of *Hiroshiman poika*, therefore leaving the series cancelled.

Figure 4 Percentage and amount of finished, ongoing and cancelled manga series by publisher



Immediately, Pauna Media Group stands out in Figure 4 for only having finished a mere 20% of their series. It is fascinating that out of all series they published, only two were ever released until the end. The first manga in question was a two-volume collection of original

stories from the *Star Wars* franchise, simply titled *Star Wars* in the Finnish release (Japanese titles: *Star Wars Kuro* and *Star Wars Gin*, English titles: *Star Wars Black* and *Star Wars Silver*). Coincidentally, the first volume was Pauna Media Group's first ever published manga comic in Finland. Other manga-styled publications from Pauna Media Group in 2007 were in fact American or Korean in origin (Lakoma 2014). The other manga Pauna Media Group published all volumes of is *Dark Metro* by Tokyo Calen and Yoshiken. The years 2008, 2009 and 2010 each saw one published volume. As discussed earlier, Ivrea's cancelled series were all from the late 2000s. While their presence in Finland's manga market has been fickle, it seems like readers can at least trust them to release their series until the end. Egmont Kustannus was quite trustworthy during their active years as well: only one of their cancelled series was not cancelled in the aftermath of their decreased manga publishing in the early 2010s (Tokio.fi 2011a). This series was Goushou Aoyama's *Magic Kaito*, an ongoing series which has been releasing in Japan sporadically since 1987. 4 volumes were translated into Finnish, which coincidentally were all volumes in existence by the late 2010s (Wikipedia n.d. d). In other words, Egmont was committed to all their series before the publisher started losing interest in manga as a medium as a whole.

Percentage wise Sangatsu Manga appears to be the most trustworthy publisher with a roughly 90% finished-until-the-end rate. Furthermore, 4 out of 8 cancelled series can be explained by Sangatsu Manga losing their publishing rights when they changed owners in 2023 (Valkama 2024a; Valkama 7 March 2023). These series are *One Piece*, *My Hero Academia* and *One-Punch Man*, which so far have all been picked up by Ivrea, and Mizuho Rino's shoujo manga *Maaginen suklaapuoti* (Japanese title: *Chocolat no Mahou*, English title: *The Magic of Chocolate*) that Sangatsu Manga released an impressive 20 volumes of from 2015 to 2021. The other 4 cancelled series were likely cut over the years due to diminished sales. Punainen jättiläinen has had its fair share of cancelled series over the years as well. One of these series was *Patriootti Moriarty* (Japanese title: *Yuukoku no Moriarty*, English title: *Moriarty the Patriot)* by Ryousuke Takeuchi and Hikaru Miyoshi, which was officially cancelled during the owner change (Valkama 2023), but was in trouble prior to that as well due to lack of sales (Valkama 6 March 2023). Ivrea has since acquired rights to the series but has yet to publish any new translated volumes (Ivrea Suomi n.d. c). Another noteworthy cancellation is *Vampire Hunter D* by Hideyuki Kikuchi and Saiko Takaki, of which 3 volumes were published from 2007 to 2009. From these release years we can suspect the series' cancellation had something

to do with Punainen jättiläinen becoming a sub-brand to Sangatsu Manga in 2009 (Sangatsu Manga n.d.). Other cancellations throughout the years were likely due to diminishing sales.

4.2.2 Analyzing Genres and Target Demographics

As Heilbron (1999, 438) argues, books translated from peripheral languages generally concentrate into very few categories. It could be said that manga as a medium is already a category that stands out among all literature translated from Japanese to Finnish. As discovered in the previous chapter, 2047 total individual volumes of manga were released in Finland from 1985 to the end of 2025. By searching the Fennica database,[5] we can find a comparative number for non-manga literature from Japan of 430 search results. However, it should be noted that many books have duplicated entries in the database, which results in a larger number of search results than the actual number of books. Regardless, even without precise numbers, it is evident that more manga has been translated into Finnish than Japanese books. Therefore, it is worthwhile to consider how genres are distributed among manga series published in Finland. As discussed in chapters 2.1.1. and 2.1.2., manga itself has many different genres for different target audiences. On Figure 5 visible on the next page, we can observe the genre distribution of Finnish manga publishers and compare them to the database MyAnimeList's genre distribution.[6]

[5] A search was made in the database on 30 March 2026 using the following filters: Content Type: Book material, Language of Original Work: Japanese, Language: Finnish, Time range: 1985–2025.
The following was inserted into the search field: NOT "Sangatsu manga" NOT "Ivrea" NOT "Punainen jättiläinen" NOT "Egmont Kustannus" NOT "Pauna Media Group" NOT sarjakuva NOT "Otomo, Katsuhiro" NOT "Nakazawa, Keiji"

[6] MyAnimeList data from 31 March 2026. Notably, the data is of series, not individual volumes.

Figure 5 Genre distribution among published volumes by publisher and genre distribution on MyAnimeList for comparison

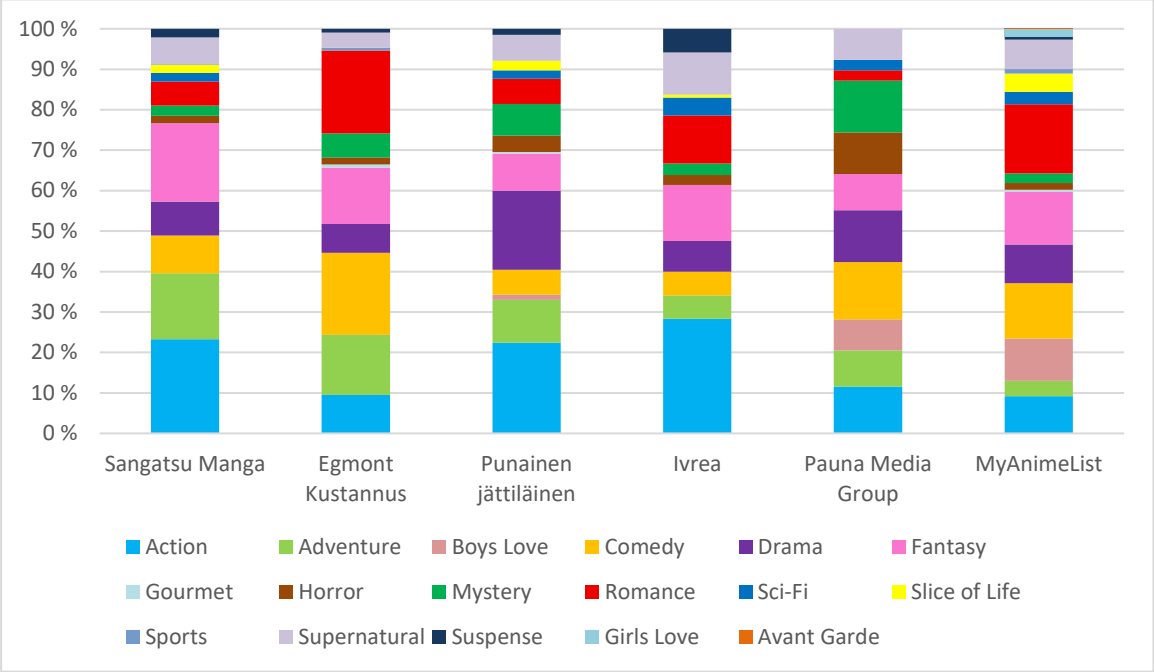


Figure 5 makes it clear to see that genre distribution among Finnish publishers is not identical to the distribution in Japan, as seen from MyAnimeList's pillar. Sangatsu Manga, for example, has a disproportional amount of action, adventure and fantasy series. These three genres are common in shounen manga, which Sangatsu Manga has published a large number of, as evident from Figure 6, visible on the next page. Romance also stands out from Sangatsu Manga's pillar for being smaller than expected. On the other hand, there is a larger than expected column for romance in Egmont Kustannus' pillar. This might similarly be explained by Egmont Kustannus' seemingly large number of shoujo series, also visible in Figure 6. Other genres that stand out as larger than expected include comedy, adventure and mystery. While comedy and adventure are common genres overall, the larger than expected amount of mystery is likely due to the 77 released volumes of *Salapoliisi Conan*, a classic detective story. Punainen jättiläinen's genre distribution has some curiosities as well. Being a brand that targets an older audience (Sangatsu Manga n.d.), it makes sense that drama, mystery and horror would appear proportionally larger than in Japan. Similarly, the smaller than expected amount of comedy could be attributed to the same reasoning. Furthermore, action has a large chunk, and romance is smaller than expected. This is likely due to the large number of seinen manga published by Punainen jättiläinen and the seeming total lack of josei series, as visible in Figure 6. Out of all publishers, Ivrea seems to cater towards action lovers the most with nearly 30% of its published volumes being action manga. This might be why comedy and romance have smaller chunks than in Japan. Curiously, Ivrea also appears to have released

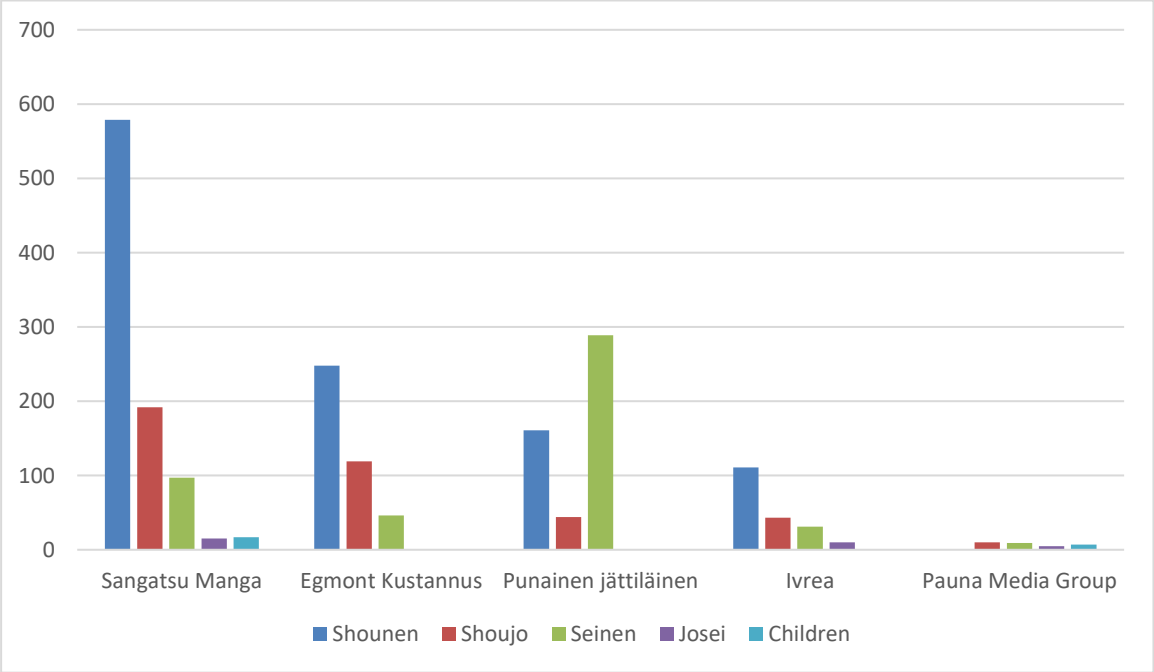
proportionally more suspense manga than any other publisher. Finally, as noted in chapter 4.1.4., Pauna Media Group seems to have released manga from a large variety of genres, with no clear focus in sight, which might have conversely made their proportions look most similar to MyAnimeList's, apart from horror and mystery that appear larger.

Certain genres are not present in Finnish publishers' pillars in Figure 5. Strikingly, no GL manga has ever been released in Finland, but this may be understandable due to the genre's small presence in Japan as well. However, little to no BL manga has been released either, even though MyAnimeList lists over 12 500 entries in the genre, accounting for around 10% of the genre distribution. Valkama (2026) commented on the matter by pointing out that publishing series from a genre like GL that already has a small audience, would be risky in a small market like Finland's. He also notes that Punainen jättiläinen has published some volumes of BL manga, but sales at the time were nothing to celebrate about (ibid.). Another genre missing in its entirety is avant garde, but this is understandable, as there are only a hundred series listed under the genre on MyAnimeList (n.d. a), hardly even visible on the pillar. Next, we can analyze what target demographics each publisher catered towards the most from the data visible on Figure 6.

Figure 6 Volumes published for target audiences by publishers



Immediately, Sangatsu Manga stands apart for having released close to 600 volumes of shounen manga. It is no surprise that their genre distribution would also reflect this, as discussed earlier. While much less than shounen, Sangatsu Manga has also released a large

number of shoujo manga, nearly 200 volumes, which is more than any other publisher in Finland. Therefore, Sangatsu Manga appears to indeed target young boys and girls, just as the publisher has claimed before (Sangatsu Manga n.d.). The same could be said about Egmont Kustannus, but they appear to have released proportionally more shoujo manga than any other publisher in Finland. No josei or children's manga was ever released by Egmont Kustannus. Punainen jättiläinen, on the other hand, stands apart for having released the most seinen manga in Finland: nearly 300 volumes. A significant portion of their selection is still shounen manga, with very little shoujo and no josei manga at all. Curiously, there were josei series released under Sangatsu Manga, but those appeared to be various animal manga, which are arguably a common theme enjoyed by younger audiences. Valkama (2026) has stated that the lack of josei series is not because they have avoided publishing josei series in particular. Sangatsu Manga has simply focused on series for younger audiences, because they have historically sold better (ibid.). In the end, it could be argued that Punainen jättiläinen's series are more likely to appeal to men and boys, but women and girls likely read them all the same. On the right, we can also see Pauna Media Group's varied catering towards all audiences, with the curious lack of shounen series that are ever so popular among other publishers.

Lastly, Ivrea's pillars appear to follow the same trend as Sangatsu Manga's and Egmont Kustannus': mostly shounen, a decent amount of shoujo, after which comes seinen. However, there are only 10 or so more volumes of shoujo than seinen released by Ivrea, which may indicate that there might one day be more seinen manga released by Ivrea than shoujo manga. The theory is also supported by Ivrea's releases in its current era: they have not released a single shoujo series since their recent comeback. Furthermore, Ivrea's website claims their full selection of series does not include josei series (Ivrea Suomi n.d. b), but this is not quite accurate. From 2011 to 2013, Ivrea published Ai Yazawa's *Paradise Kiss*, which is a josei series. Upon further examination, Ivrea's website seems to only display series they published before their reform in 2014 (Uusitalo 2014, 14), apart from Mayu Shinjou's *Love Celeb*, which they published from 2009 to 2013. This is an interesting discovery, because this would make it the only series still sold by Ivrea that is an indirect translation. These volumes sold today could either be leftover volumes from storage, or perhaps Ivrea reprinted the series at some point in time. It is also possible that they are now selling a new edition of the manga, this time translating it directly from Japanese. To investigate this, I had the idea of comparing ISBN numbers and Fennica entries. To start, the ISBN numbers mentioned on Ivrea's webstore for *Love Celeb* (Ivrea Suomi n.d. a) matches those of the volumes from 2009–2013, which are the only

volumes listed on the Fennica database regardless. For further investigation, I decided to have a look at other series. For example, some volumes of *Shugo Chara!*, published and reprinted by Sangatsu Manga in 2022, are found in Fennica and marked as 2022 releases, but their ISBN numbers match their first editions. Meanwhile, Kiyohiko Azuma's *Azumanga Daioh*, a series which has been reprinted with a second translation, has all of its volumes listed on Fennica twice for both translations. These entries also feature different ISBN numbers. To conclude, this evidence appears to support the theory that Ivrea is selling old volumes of *Love Celeb*. Then again, the series is notable for never having been sold at retail stores (Uusitalo 2014, 15), so perhaps it is more likely than not that Ivrea has old volumes left in storage. Regardless of this, it is curious that the marketing on Ivrea's website today omits josei manga in its entirety. We can then conclude that even within the medium of manga, certain categories and genres that received more or less translations could, in fact, be identified.

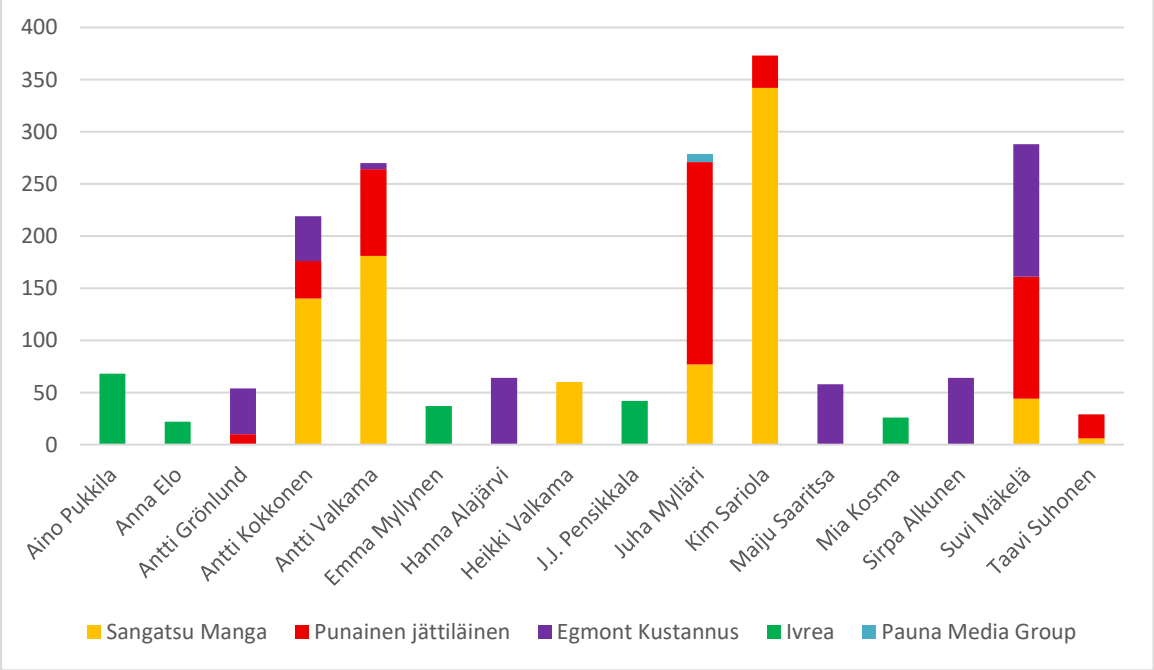
4.2.3 Translations and Translators

Nowadays, all manga published in Finland is translated directly from Japanese. However, this was not always the case. The only exception to this is Sangatsu Manga, who have always translated their Japanese manga series directly from Japanese (Valkama 2026). While confirming the directness of each translation one by one was not possible within the time limit of this study, at least one example from other publishers was discovered that pointed towards an indirect translation. For example, some of Punainen jättiläinen's early releases as an independent publishing house were indirect translations, according to Saana's (2016) list of manga translated into Finnish. These series were *Princess Ai*, *Vampire Hunter D* and *Azumanga Daioh*. The latter is curious for being one of the few manga series in Finland that have received multiple translations: Antti Grönlund translated the series originally from German, and Juha Mylläri would later translate the series directly from Japanese for the 2nd edition that released in 2012 (Saana 2016). Since becoming a sub-brand to Sangatsu Manga, Punainen jättiläinen's releases have been translated directly from Japanese. Other series that have received multiple translations are *My Hero Academia*, *One Piece* and *One-Punch Man*, as discussed earlier. Sangatsu Manga's releases of the series were translated by Antti Valkama (*My Hero Academia*, *One Piece* vol. 1–102), Heikki Valkama (*One Piece* vol 1–8) and Kim Sariola (*One-Punch Man*). Ivrea's releases have been translated by Aino Pukkila. From Egmont Kustannus, Goushou Aoyama's *Salapoliisi Conan* and Rumiko Takahashi's *Rinne ½* were both translated from German by Sirpa Alkunen (*Ranma ½, Salapoliisi Conan* vol. 45–71) and Antti Grönlund (*Salapoliisi Conan* vol. 1–44). Aside from *Pokémon*

Adventures, all of Pauna Media Group's releases were likely indirect translations from English. Finally, all of Ivrea's releases prior to the reform in 2014 (Tokio.fi 2013; Uusitalo 2014) were, in all likelihood, indirect translations from Spanish. Another point of interest for manga translations is their reading direction. Within the limits of this study, the following series were found to be mirrored: Katsuhiro Otomo's *Akira*, the first volume of Keiji Nakazawa's *Hiroshiman poika*, and Rumiko Takahashi's *Ranma ½*. It would therefore appear that only 3 manga series were published mirrored in Finland. Notably, all of these were among the first series to be released in Finland, after which publishers likely noticed that Finnish readers preferred their manga in the original reading direction. Furthermore, it is entirely possible that because Finland's manga boom happened later than in some other countries, there was no reason to experiment with Finnish readers, and instead learn from the example of other countries, such as Germany, as accounted by Jüngst (2004, 92–93)

Figure 7 below lists every translator of Finnish manga that has translated at least 20 volumes total, which amounts to 16 translators. Additionally, this study counted another 16 translators who had translated less than 20 volumes, which made it a convenient halfway mark for choosing which translators to feature in the graph. Furthermore, as these translators are less significant to the history of manga translation in Finland, it was deemed best to leave their names out for privacy reasons. The graph also displays which publisher the translator has translated for.

Figure 7 Most productive manga translators in Finland and the publishers they have translated for



Roughly speaking, it can be said that manga translators in Finland are not loyal to one publisher only. Most translators that have translated over 100 volumes have done so for more than one publisher. Kim Sariola is the only exception, as he has technically only translated for one publisher, since Punainen jättiläinen is a sub-brand of Sangatsu Manga. Furthermore, Sariola is the most productive manga translator in Finland, having translated a total of 373 individual volumes. After him comes Antti Valkama with a total of 304 translated volumes, Suvi Mäkelä with 288 volumes, and Juha Mylläri with 278 volumes. Antti Kokkonen does not fall too far behind either with his 219 volumes. Out of all publishers, only Ivrea has kept their translators to themselves. Notably, Aino Pukkila is the only translator currently working for Ivrea, as every release from Ivrea since 2024 has been translated by her.

4.2.4 Most Published Mangaka and Manga

For the most part, majority of mangaka had only one manga series of theirs translated. This, in part, highlights just how beloved the most published mangaka is in Finland. To no surprise of Finland's manga readers, it is Yoshihiro Takahashi, known primarily for creating *Hopeanuoli* and its numerous sequels and spin-offs. 166 volumes and 17 individual titles of Yoshihiro Takahashi's manga have been translated into Finnish since 2010. Currently, the Finnish translation of his series *Noah* (Japanese title: *Ginga Densetsu Noah*, English title: *Legend of Silver Fang Noah*) is in the middle of publishing, with 14 volumes released by the end of 2025. The 2nd most published author is arguably more familiar to the international audience: Eiichiro Oda with his series *One Piece*. Coincidentally, it is also the longest running series in Finland: Sangatsu Manga brought *One Piece* to Finnish readers in 2005 and continued to publish the series until its 102nd volume in 2023. Since then, Ivrea has continued its publishing and has also re-released volumes 1 to 7 with brand-new translations. Currently, 107 volumes of *One Piece* have been released in Finnish. If we combine the new translations to this number, a total of 114 volumes of *One Piece* have been released in Finland. On top of *One Piece*, a short collection of Oda's short stories known as *Wanted!* has also been translated into Finnish. This brings the total of volumes released from Oda to 115. On third place is another mangaka that manga readers across the world are familiar with: Rumiko Takashi with 106 volumes released across 3 different series. As the best-selling female comics artist in history (MyAnimeList n.d. b), it comes off as no surprise that she is the most published female mangaka in Finland as well. Her shounen series *Ranma ½* and *InuYasha* were translated in their entirety, but *Rinne* was unfortunately left unfinished at 14 volumes when Egmont Kustannus left manga publishing behind in 2013 (Anime 2013). In terms of women, it's also worth

mentioning Finland's most published shoujo manga author: Arina Tanemura. Five of her series, *Time Stranger Kyouko*, *Kamikaze Kaitou Jeanne* (English title: *Phantom Thief Jeanne*), *Full Moon wo Sagashite*, *The Gentleman's Alliance Cross* (Japanese title: *Shinshi Doumei Cross*) and *Prinsessa Sakura* (Japanese title: *Sakura-hime Kaden*, English title*: Sakura Hime: The Legend of Princess Sakura*), have all been published in their entirety, totaling 40 volumes. Other authors that stand out from the data include Goushou Aoyama with 2 series (*Salapoliisi Conan* and *Magic Kaito*) and 81 volumes, Akira Toriyama with 42 volumes of *Dragon Ball* and 3 single volume releases (*Kajika*, *Nekomajin* and *Sandland*) totaling to 45 volumes, Tite Kubo with 74 volumes of *Bleach* and Masashi Kishimoto with 72 volumes of *Naruto* and the single volume side story *Naruto – Seitsemäs Hokage ja uusi sukupolvi* (Japanese title: *Naruto Gaiden: Nanadaime Hokage to Akairo no Hanatsuzuki*, English title: *Naruto: The Seventh Hokage and the Scarlet Spring*).

5 Conclusion

The manga scene in Finland has seen many events throughout the years: publishers have come and gone, published manga volumes peaked during the late 2000s, and a large variety of series have found their way to Finnish readers. When I started this study, I asked this question: What kinds of manga series have been translated into Finnish? I was particularly curious about what categories for target demographics were favored and what genres stood out from the rest. Shounen is undoubtedly Finnish manga publishers' favored demographic, with 1101 volumes released, or roughly 54% out of the total 2047 volumes. However, this discovery should not be used to argue that manga readers in Finland consist mostly of men. As pointed out by Valkama (2026) and Uusitalo (2016, 36), manga readers in Finland are likely split evenly between women and men. The large proportion of shounen manga speaks more about Finnish publishers' choice to translate series of the category and what Finnish readers read, rather than the gender of an average Finnish reader. After all, a primary motivation for publishers is to publish manga that sells, as stated by Valkama (2026). He further clarifies this thought by listing variables that affect deciding what manga series to publish: the popularity of a series, how interesting its story and art are, market situation and the publisher's resources. Primarily, he highlights that a series should not be for an audience so niche that only hardcore manga fans would purchase it (ibid.). It can be said that these are the major translation policies of Sangatsu Manga and Punainen jättiläinen, and based on the data, other publishers likely to agree with them. As noted earlier, these policies manifest in a tendency to release more shounen manga, because it appeals to readers of all genders and ages. Similarly, certain genres such as action, adventure and fantasy, see proportionally higher number of releases. Egmont Kustannus likely had a policy that resulted in them releasing a proportionally larger number of shoujo series than other publishers, which also resulted in them releasing proportionally more romance manga than the rest. Punainen jättiläinen, as a sub-brand to Sangatsu Manga, has a policy to publish series for older audiences, which is evident from majority of their releases being seinen manga and from their proportionally high number of drama, mystery and horror manga. While the 2000s saw indirect translations from most publishers and some mirrored manga, in the current day publishers seem to value authenticity above all else. Especially Ivrea has bettered their ways and now translates their series directly from Japanese. Therefore, key translation policies that Finnish manga publishers follow can be summed up to their perception of the audience and profitability. On the topic of translators, 16 translators were identified who had all translated at least 20 volumes of manga. Out of those 16, 5

individual translators have translated over 200 volumes. The remaining 11 have all translated less than 70 volumes. It could be argued that Finnish manga publishers have a policy that favors a select few translators who then end up getting the most work. It was also discovered that Finnish manga translators do not appear to work exclusively with only one publisher, apart from Ivrea's translators.

While the best years of Finland's manga scene may be in the past, it is safe to assume that manga publishing will continue in the future as well, likely in a similar scale as it is today. Antti Valkama of Sangatsu Manga and Punainen jättiläinen has explicitly stated that they have all intentions to continue publishing. Similarly, Ivrea appears to be motivated about publishing in Finland. Although, knowing their history, there is a chance they will fold from the market once again. Pauna Media Group has ceased to exist, which makes their reappearance very unlikely. Jalava or Like each published only one series before the 2000s. It also seems unlikely that they would return to publish manga in Finland after publishers specializing in manga have appeared. Similarly, as Egmont Kustannus has not published any manga in Finland for over a decade now, it seems unlikely that they would make a return. Of course, it is also possible that a brand-new publisher may emerge and attempt to publish manga in Finland. In my thesis, I analyzed Finland's manga scene from largely a sociological perspective with hints of economical perspectives. The findings of my study largely aligned with those of Uusitalo's from 2014 and 2016. In particular, Uusitalo (2016, 37) claimed that the majority of manga published in Finnish have been and will always be shounen, which appears to be the case today as well. I believe that bibliographical study combined with qualitative research was a suitable methodology for my topic of interest. That being said, as the data is massive, it could have been utilized in other ways as well. For example, while I looked at target demographics particularly from the perspective of publishers, Uusitalo (2016) had looked at volumes catering to certain target demographics by year. In other words, there are many other graphs and conclusions that could have been made from the data if there had been more time for such analysis. On one hand, this study was able to get a general understanding of Finland's manga scene. On the other, it could not be precise enough to draw conclusions about individual manga series or delve deep into what kinds of translation strategies or operational norms are used by individual translators or publishers. With this in mind, future studies could compare different Finnish translations of manga, for example, Ivrea and Sangatsu Manga's translations for either *My Hero Academia*, *One Piece* or *One-Punch Man*. As this study had no time to consider the age brackets set by Finnish publishers, one could also study how

closely publishers' recommended age brackets match the original Japanese target demographics. Furthermore, a study could be conducted on manga readers in Finland, so that precise numbers about the demographic could be acquired. Finland's statistics could also be compared to other countries. For example, one could study if series translated into a peripheral language such as Finnish have been translated to central or semi-central languages like English, or if Finnish manga translations are purely series that have gained popularity worldwide. Lastly, a similar bibliographical study could always be conducted again in a decade or two.

Appendices

Appendix 1 Finnish Summary / Suomenkielinen lyhennelmä

Johdanto

Ensimmäinen suomennettu manga, Nakazawa Keijin *Hiroshiman poika* (1973), julkaistiin vuonna 1985 (Valkama 2024b). Sarjan toista osaa saatiin kuitenkin odottaa, sillä se julkaistiin vasta vuonna 2006, eikä sarjan kymmenestä osasta loppujen lopuksi julkaistu sen enempää osia. Seuraava suomennettu manga, Otomo Katsuhiron *Akira* (1982), julkaistiin kokonaisuudessaan vuodesta 1995 vuoteen 2006. Julkaisut olivat kuitenkin harvaksessa, kunnes varsinainen mangabuumi käynnistyi vuonna 2003. Sinä vuonna suomalaisille julkaistiin Akira Toriyama *Dragon Ball* (1984) ja Rumiko Takahashin *Ranma ½* (1987). Nämä kaksi erottuivat edukseen, sillä ne olivat helposti ostettavissa lehtipisteistä. Näin mangaa pystyi ostamaan kuka tahansa satunnainen lukija, erityisesti lapset ja nuoret, eikä heidän tarvinnut marssia varta vasten kirjakauppaan. (Valkama 2024b.)

Suomessa julkaistusta mangasta ei ole tehty paljoa tutkimusta. Mika Simanainen (2025) ylläpitää nettisivua nimeltä Tokio.fi, jonne on listattu kaikki suomeksi julkaistut mangasarjat, mutta tätä listaa ei ole käytetty hyödyksi akateemisessa tutkimuksessa. Vuonna 2013 Petteri Uusitalo kirjoitti Anime-lehteen artikkelin markettimangan kymmenenvuotisesta historiasta, mutta aukeaman kokoinen artikkeli ehti lähinnä tiivistämään tärkeimmät tapahtumat. Vuonna 2016 hän kirjoitti samaiseen lehteen toisenkin artikkelin, joka käsitteli suomeksi julkaistun mangan kohdeyleisöjä. Jari Nyman (2015) taas on opinnäytetyössään lyhyesti kerrannut suomeksi julkaistun mangan historiaa, perehtymättä tarkemmin siihen, minkälaista mangaa on julkaistu. Nämä kaikki on kuitenkin tehty viime vuosikymmenellä, minkä jälkeen suomen mangamarkkinoilla on ehtinyt tapahtumaan kaikenmoista. Nyt onkin oiva aika tehdä uusi tieteellinen tutkimus, joka kävisi kattavasti läpi mangajulkaisun historiaa Suomessa.

Tässä tutkielmassa pyrin vastaamaan seuraaviin kysymyksiin: minkälaisia mangasarjoja on käännetty suomeksi ja julkaistu Suomessa? Tekevätkö suomen mangajulkaisijat joitain käännöspoliittisia ratkaisuja? Entä mitä päätelmiä voidaan tehdä mangan julkaisusta Suomessa? Pyrin vastaamaan näihin kysymyksiin bibliografisen tutkimuksen avulla, jonka teetän keräämällä listan kaikista suomeksi julkaistuista ja käännetyistä mangasarjoista. Lista perustuu Simanaisen (2025) jo olemassa olevaan listaan, mutta olen täydentänyt listan tietoja ja lisännyt mm. sarjojen kohdeyleisön ja kääntäjät. Listan lisäksi haastattelin myös yhtä suomen

aktiivista mangajulkaisijaa: Sangatsu Mangaa / Punaista jättiläistä. Näin ollen tutkielma on menetelmiltään pääasiasiallisesti kvantitatiivinen, mutta siinä on myös kvalitatiivisia piirteitä.

Teoriaa ja taustatietoa

Välillä voi kuulla jonkun väittävän, että manga on ’genre’. Kyllähän manga eroaa länsimaalaisista sarjakuvista, mutta sanoisin sen olevan vain yksi tarinankerronnan muoto muiden joukossa. Mangasarjat voivat olla hyvinkin erilaisia: niissä on eri genrejä ja niitä on tehty eri ikäisille. Olisi virheellistä väittää, että manga on yksi yhtenäinen genre. Fabbretti ja Idone Cassone (2025, 362) ovat esitelleet mangan viisi eri julkaisukategoriaa, jotka on tehty tietyt kohdeyleisöt mielessä: **lapset**, **shounen** (pojat), **shoujo** (tytöt), **seinen** (miehet) ja **josei** (naiset). Kategoriat ovat peräisin lehdistä, joissa mangaa julkaistaan Japanissa. Toisin sanoen esim. poikienlehdissä julkaistut sarjat ovat perinteisesti shounen-sarjoja. (ibid.) Nämä kategoriat eivät kuitenkaan ole genrejä nekään, vaan kategorioiden sisällä on laaja valikoima perinteisiäkin genrejä. Esim. MyAnimeList (n.d. a) luokittelee mangasarjoja näiden genrejen mukaan: toiminta, seikkailu, avant garde, palkittu sarja, boys love, komedia, draama, fantasia, girls love, ruoka, kauhu, arvoitus, rakkaus, scifi, slice of life, urheilu, yliluonnollinen ja jännitys. Genreistä suurin osa ovat yksiselitteisiä, mutta erityisesti boys love (BL) ja girls love (GL) ovat selittämisen tarpeessa. Näillä termeillä tarkoitetaan sarjoja, jotka kuvaavat samaa sukupuolta olevien henkilöiden välisiä rakkaussuhteita. (ibid.) Tietyillä julkaisukategorioilla voi olla taipumus sisältää enemmän jonkin tietyn genren sarjoja kuin toisen, mutta sehän ei pois lue näiden genrejen mahdollisuutta näkyä muiden kohdeyleisöjen sarjoissa. Yleisesti sanottuna suurin osa sarjoista edustaa ainakin kahta eri genreä, mutta vain yhtä julkaisukategoriaa.

Tutkielman teoreettinen viitekehys perustuu kahteen käsitteeseen: perifeeristen kielten välillä kääntäminen ja käännösnormit. Johan Heilbron (Heilbron 1999, 433) on todennut, että kaikki maailman kielet voidaan jakaa joko **keskeisiin** (central), **lähes-perifeerisiin** (semi-peripheral) ja **perifeerisiin kieliin**. Keskeisiä kieliä ovat mm. ranska, saksa, venäjä ja erityisesti englanti, josta käännetään kaikista eniten kirjoja koko maailmassa. Lähes-perifeeriset kielet kattavat noin 1–3 prosenttia käännetyistä kirjoista, joita on noin 6 kieltä. Kaikki kielet, joista käännetään sitäkin vähemmän, mukaan lukien suomi ja japani, ovat perifeerisiä. (ibid.) Heilbron (1999, 438) on myös väittänyt, että kahden perifeerisen kielen väliset käännökset ovat tyypillisesti keskittyneet vain muutamaan kategoriaan.

Toury (2012, 81–82) on jakanut käännösnormit, eli kääntämiseen vaikuttavat sosiaaliset säännönmukaisuudet, **ennakkonormeihin** ja **toimintanormeihin**. Toimintanormit koskevat itse käännösprosessia, kun taas ennakkonormit tarkoittavat kaikkia niitä käännökseen vaikuttavia valintoja, jotka tehdään ennen kuin itse kääntäminen edes aloitetaan. (ibid.) Tässä tutkielmassa keskitytään käännösten sijasta käännösten julkaisemiseen, joten ennakkonormit ovat tutkielman ytimessä. Ennakkonormeihin kuuluu **käännöspoliittiset ratkaisut** (translation policy), jotka määrittävät, minkälaisia teoksia käännetään kohdekulttuurin luettavaksi (Toury 2012, 82). Ennakkonormeihin kuuluu myös päätökset siitä, käännetäänkö teokset **suoraan** vai **epäsuorasti** välikielen kautta. (ibid.)

Materiaali ja metodi

Tutkielman ensisijainen materiaali on sitä varten tehty lista Suomessa julkaistusta mangasta, jonka pohjana on käytetty Simanaisen (2025) listaa Suomessa julkaistusta mangasta. Tehty lista on myös osana tätä tutkielmaa liitteenä numero kolme. Tutkielman lista on tehty Excelissä, ja jokaisen nimikkeen kohdalla lukee sarjan nimi, tekijä(t), julkaisuvuosi, julkaisija, kääntäjä, tila, 1–4 genreä ja kohdeyleisö. Jokaisen sarjan osat on listattu yksitellen, minkä ansiosta listasta voi selvittää mm. tiettyä genreä julkaistujen pokkareiden määrän. Lista on rajattu vuodesta 1985 vuoden 2025 loppuun, eikä listaan lisätty sarjoja tai pokkareita, jotka on julkistettu, mutta ei vielä julkaistu. Listasta jätettiin pois myös uusintapainokset. Lyhyesti sanottuna, jokainen mangapokkari sisällytettiin listaan, jos se oli julkaistu Suomessa, suomeksi, ja jos se oli alun perin julkaistu Japanissa. Muutamassa tapauksessa mangasarja tai osa sen pokkareista oli käännetty toiseen kertaan toisen kääntäjän toimesta. Silloin nämä uudet käännökset laskettiin mukaan, koska tässä tutkielmassa minua kiinnosti myös tietää, montako yksittäistä nidettä eri kääntäjät ovat kääntäneet. Tutkielman toissijainen materiaali on mangajulkaisijan sähköpostihaastattelu, johon vastasi Sangatsu Mangan ja Punaisen jättiläisen kustannuspäällikkö Antti Valkama. Haastattelun tarkoituksena oli saada lisätietoa asioista, joille ei löytynyt muita lähteitä, ja kysyä kustantajan mielipiteitä tutkielman alustavista tuloksista ja mangan kustantamisesta yleisesti.

Tutkielma käynnistyi listan kokoamisella ja tiedonhaun merkeissä. Tiedonlähteinä toimivat mm. Suomessa mangaa julkaisseiden kustantajien nettisivut ja some-tilit, tieteelliset lähteet, sekä lehdet ja blogit, joissa keskusteltiin Suomen mangajulkaisuista. Lista tehtiin Simanaisen (2025) listan pohjalta, johon lisättiin erityisesti sarjojen kohdeyleisöt ja kääntäjät. Myös muutamia paljastuneita alkuperäisen listan puutoksia täydennettiin. Tiedonlähteinä toimivat mm.

MyAnimeList-sivusto, Suomen kansallisbibliografia Fennica, ja toisen harrastajan (Saana 2016) lista Doki Doki -sivustolla. Näiden kaikkien tietoja verrattiin toisiinsa, ja tutkielman listaa täytettiin näiden tietojen pohjalta. Kun lista tuli valmiiksi, kaksi suomen aktiivista mangakustantajaa, Ivrea ja Sangatsu Manga / Punainen jättiläinen kutsuttiin sähköpostihaastatteluihin. Sähköposti sisälsi haastattelukysymykset ja lyhyen kuvauksen tutkielmasta. Valitettavasti Ivrea ei koskaan vastannut, joten lopullisessa tutkielmassa tultiin hyödyntämään vain Sangatsu Mangan / Punaisen jättiläisen haastattelun vastauksia. Samanaikaisesti listan data analysoitiin erilaisten taulukoiden avulla, ja niiden löydöksiä pohdittiin. Lopuksi tehtiin päätelmiä kaiken taustatiedon, löydöksien ja haastatteluvastausten perusteella.

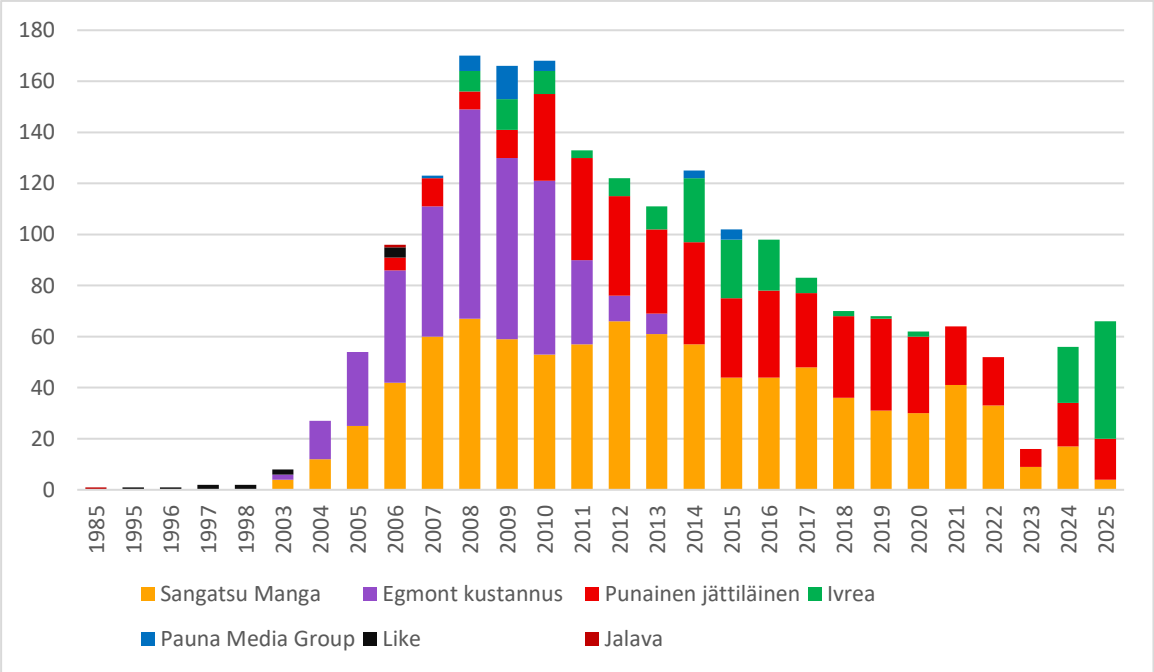
Analyysi

Suomessa on ollut yhteensä 7 eri kustantajaa, jotka ovat julkaisseet ainakin yhtä mangasarjaa: **Jalava**, **Like**, **Egmont Kustannus**, **Sangatsu Manga**, **Punainen jättiläinen**, **Pauna Media Group** ja **Ivrea**. Jalava oli ensimmäinen kustantaja, joka julkaisi mangaa Suomessa. Se julkaisi Nakazawa Keijin *Hiroshiman pojan* ensimmäisen osan vuonna 1985 ja toisen vuonna 2006. Sen jälkeen kustantaja ei kuitenkaan ole julkaissut mangaa. Like puolestaan julkaisi Otomo Katsuhiron *Akiran* kokonaisuudessaan vuodesta 1995 vuoteen 2006, mutta ei myöskään jatkanut mangan julkaisua sen jälkeen. *Hiroshiman poika* oli suora käännös japanista, kun taas *Akira* oli käännetty välikielen kautta. 2000-luvulla alkoi ilmestyä kustantajia, jotka erikoistuivat mangan kustantamiseen. Vuonna 2003 Akira Toriyaman *Dragon Ball* -sarjan ensimmäiset 4 pokkaria julkaistiin Tammen omistaman Kustannus Kolibrin nimessä. Pian Kustannus Kolibri kuitenkin sulautettiin Tammeen, ja Sangatsu Manga niminen brändi luotiin Tammen mangajulkaisuja varten. (Valkama 9. Maaliskuuta 2023.) Sangatsu Manga on tätä nykyä kaikkein pisimpään Suomessa aktiivisesti mangaa julkaissut kustantaja. Samana vuonna mangan julkaisun aloitti Egmont Kustannus Rumiko Takahashin sarjalla *Ranma ½*. Vuonna 2005 perustettiin Punainen jättiläinen, joka oli japanilaisiin ja korealaisiin sarjakuviin erikoistunut itsenäinen kustantaja. Tammi kuitenkin osti Punaisen jättiläisen vuonna 2009, minkä jälkeen se on ollut toinen mangan julkaisulinja Sangatsu Mangan ohella. (Sangatsu Manga n.d.) Pauna Media Group kokeili onneaan mangajulkaisun parissa vuosina 2007–2010, muttei lopuksi julkaissut montaa sarjaa, eikä edes julkaissut suurinta osaa sarjoistaan loppuun asti. Vuonna 2008 Suomen mangamarkkinoille ilmestyi argentiinalainen Editorial Ivrea, joka myöhemmin alkoi julkaista Ivrea Suomi -nimen alla. Ivrea kuitenkin piti taukoa julkaisuissaan vuosina 2010 ja 2013. (Uusitalo 2014.) Vuonna 2013 suomen mangamarkkinat saivat kolauksen, kun Egmont Kustannus lopetti mangan julkaisun kokonaisuudessaan (Anime

2013). Samoihin aikoihin Ivrea kuitenkin palasi tauoltaan ja uudisti julkaisujaan sekä muodoltaan että sisällöltään: käännökset tehtiin vastedes suoraan japanista, eikä espanjan kautta (Uusitalo 2014). Yllättäen myös Pauna Media Group teki hetkellisen paluun, kun se julkaisi 7 osaa Hidenori Kusakan, Satoshi Yamamoton ja Maton *Pokémon Adventures* mangaa vuodesta 2014 vuoteen 2015 (Uusitalo 2015). Tämän jälkeen Pauna Media Group kuitenkin lopetti toimintansa, ja myös Ivrea vähensi julkaisujaan kunnes se katosi jo kolmannen kerran vuonna 2021. Seuraava suuri muutos tapahtui vuonna 2023: Sangatsu Manga ja Punainen jättiläinen vaihtoivat omistajaa. Tätä nykyä brändit omistaa H-Town. (Valkama 2023.) Viimeisimpänä yllätyksenä Ivrea teki paluun Suomen mangamarkkoinoille vuonna 2024. Vuoden 2025 loppuessa Suomessa on siis kaksi aktiivista mangan julkaisijaa: Sangatsu Manga / Punainen jättiläinen ja Ivrea Suomi.

Bibliografista tutkimusta tehdessä selvisi, että Suomessa on julkaistu yhteensä 233 eri sarjaa ja 2047 yksittäistä nidettä. Julkaisuja on ylivoimaisesti eniten Sangatsu Mangalla: tasan 900 nidettä eli noin 44 % kaikista niteistä. Kun mukaan lasketaan Punaisen jättiläisen julkaisut, 494 nidettä eli noin 25 %, ovat ne julkaisseet yhteensä 1394 nidettä eli noin 68 % kaikesta suomenkielisestä mangasta. Egmont Kustannuksen osuus Suomen mangajulkaisuista on 20 %, kun taas Ivrean osuus on 10 %. Alla näkyvästä Taulukosta 1 käy ilmi, että Suomessa julkaistiin eniten mangaa vuosina 2007–2010.

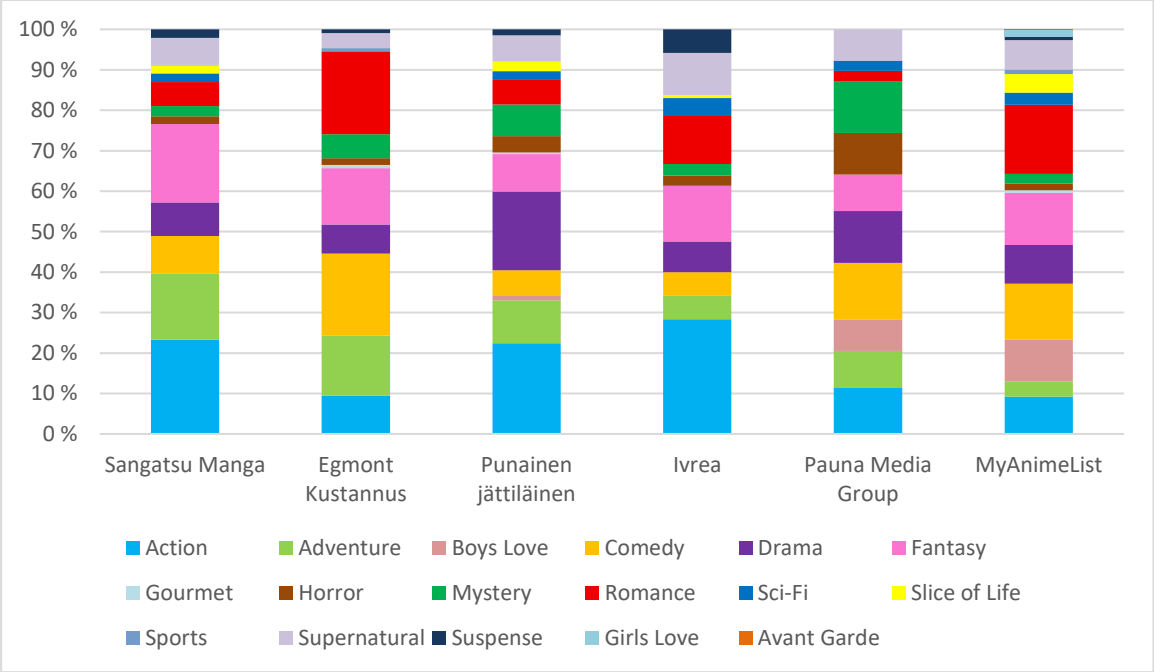
Taulukko 1 Mangajulkaisut julkaisijoineen vuodesta 1985 vuoteen 2025



Sen jälkeen julkaisut ovat laskeneet tasaista tahtia, mikä enimmäkseen johtuu muiden julkaisijoiden kuin Sangatsu Mangan ja Punaisen jättiläisen julkaisujen loppumisesta tai vähenemisestä. Poikkeuksena erottuu vuosi 2023, jolloin Sangatsu Manga ja Punainen jättiläinen vaihtoivat omistajaa (Valkama 2023), mikä on todennäköisesti syy kyseisen vuoden julkaisujen vähäisyyteen. Kuvaajasta erottaa myös hyvin, kuinka Ivrea vähensi julkaisujaan 2010-luvun loppupuolella, ja kuinka kustantamon paluu viimevuosina toi mukanaan ennätysmäärän julkaistuja niteitä.

Seuraavaksi pohdin genrejä ja kohdeyleisöjä. Alla näkyvästä taulukosta 2 kävi ilmi, että suomeksi ei ole julkaistu eri genrejä samassa suhteessa, kuin niitä on olemassa Japanissa.

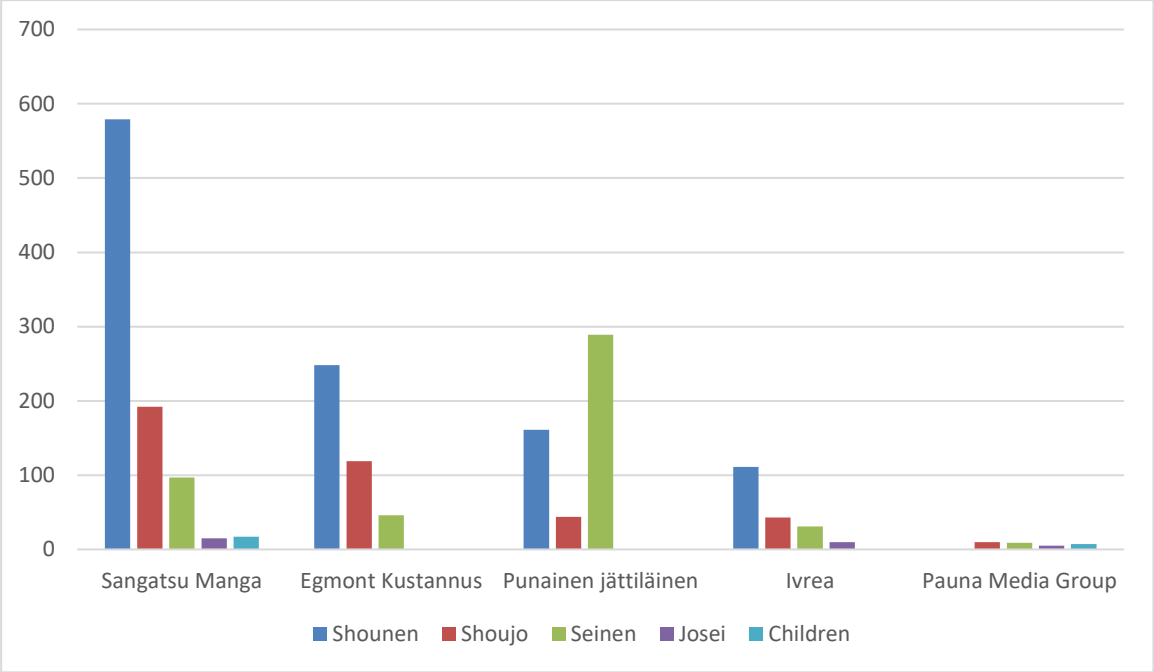
Taulukko 2 Eri kustantamojen niteiden genrejakauma verrattuna MyAnimeList-sivuston jakaumaan



Esimerkiksi Sangatsu Manga on julkaissut huomattavasti enemmän toimintaa, seikkailua ja fantasiaa, mikä saattaa johtua siitä, että genret ovat yleisiä shounen-mangassa, mitä Sangatsu Manga on myös julkaissut reilusti, kuten ilmenee Taulukko 3:sta. Samaten Taulukko 2:ssa erottuu Egmont Kustannuksen kohdalla rakkausgenren julkaisut, mikä todennäköisesti johtuu siitä, miten he julkaisivat suhteellisesti eniten shoujo-mangaa verrattuna muihin kustantajiin, kuten seuraavalla sivulla näkyvä Taulukko 3 paljastaa. Punainen jättiläinen taas erottuu selkeästi Taulukko 3:ssa, koska he ovat julkaisseet eniten seinen-mangaa, eikä shounenia, niin kuin lähes kaikki muut kustantajat. Tämä kuitenkin johtunee siitä, että Punainen jättiläinen on brändinä erikoistunut julkaisemaan sarjoja varttuneimmille lukijoille (Sangatsu Manga n.d.).

Taulukosta 2 erottaa myös, kuinka Punaisen jättiläisen kohdalla genreistä nousee esiin draama, jännitys ja kauhu, jotka lienevät juuri varttuneemman yleisön makuun.

Taulukko 3 Eri kustantamojen julkaistut niteet eri kohdeyleisöille



Taulukoista 2 ja 3 käy ilmi myös, että tiettyjä genrejä ja kohdeyleisökategorioita ei juurikaan julkaista Suomessa. Suomessa ei ole julkaistu yhtä ainuttakaan GL-mangaa, eikä BL-mangaa ole myöskään julkaistu kovin paljoa. Myös josei-kohderyhmän mangaa on julkaistu hyvin vähän. Valkama (2026) kertoo, ettei Suomessa kannata julkaista jo alkujaan pienen yleisön teoksia, johon GL-manga kuuluu. Taulukosta 2 kuitenkin huomaa, että BL-mangaa on huomattavasti enemmän Japanissa kuin esim. seikkailumangaa. Josei-mangan vähäisyyttä Valkama (2026) taas kommentoi huomauttamalla, että esim. shounen-mangan lukijakunta jakautuu Suomessa hyvin tasaisesti miesten / poikien ja naisten / tyttöjen kesken. Hän kertoo myös, että nuorten sarjat ovat yleensä menestyneet paremmin, mikä selittää niiden määrän suuruuden aikuisten sarjoihin verrattuna.

Lopuksi analyysissä pystyi erottamaan muutamia mielenkiintoisia faktoja. Suomeksi julkaistu manga on pääasiassa käännetty suoraan Japanista, joskin tämä on vasta tullut normiksi 2010-luvun puolella. Sitä ennen mm. Ivrea käännätti kaikki sarjansa espanjasta suomeksi. Suomen mangakääntäjillä on yleensä yksi kustantamo, jonka leivissä he kääntävät päätoimisesti, mutta erityisesti eniten kääntäneet kääntäjät ovat tehneet töitä toisillekin kustantajille. Tästä poikkeuksena on Ivrea, jonka kääntäjät ovat kääntäneet vain Ivrealle. Kääntäjistä ilmeni myös se, että yhteensä 16 kääntäjää on kääntänyt ainakin 20 nidettä mangaa suomeksi. Heistä viisi on

jokainen kääntänyt yli 200 nidettä. Suomeksi käännetystä mangasta erottui myös faktoja. Kaikista eniten on käännetty Yoshihiro Takahashin mangaa, yhteensä 166 pokkaria ja 17 eri sarjaa. Kaikista pisimpään taas on julkaistu Eiichiro Odan *One Piece* -mangaa, jota on julkaistu 107 osaa 114 pokkarin edestä. Mainittakoon vielä, että suomeksi eniten julkaistu shoujo-mangan tekijä on Arina Tanemura. Viisi eri hänen sarjaansa on julkaistu suomeksi, joiden pokkareita on yhteensä 40 kappaletta.

Yhteenveto

Suomen mangamarkkinoilla on tapahtunut vuosien varrella kaikenlaista: kustantamoja on tullut ja mennyt, julkaistujen niteiden määrä näki huippunsa 2000-luvun loppuvuosina, ja moni erilainen sarja on löytänyt tiensä suomalaisten lukijoiden hyllyihin. Suomessa on julkaistu kaikista eniten shounen-kohdeyleisökategorian sarjoja, yhteensä 1101 nidettä eli reilut 54 % kaikesta suomimangasta. Mutta kuten Valkama (2026) ja Uusitalo (2016, 36) ovat sanoneet, mangan suomalaisista lukijoista noin puolet ovat miehiä ja toinen puolikas naisia. Valkaman haastattelusta käykin ilmi, että Suomen mangakustantajien käännöspoliittiset ratkaisut liittyvätkin todennäköisesti siihen, miten tunnettu teos on, kuinka kiinnostava sen tarina ja kuvitus ovat, miltä markkinatilanne näyttää, ja miten paljon rahkeita kustantajilla on sarjan julkaisuun. Erityisesti esille nousee se, ettei pienen yleisön sarjojen oleteta menestyvän Suomen kaltaisella pienellä markkina-alueella. (Valkama 2026.) Näin julkaistuista sarjoista suurin osa onkin shounen-sarjoja, sillä ne ovat tyypillisesti suosittuja kaiken ikäisten ja sukupuolisten lukijoiden keskuudessa. Kävi myös ilmi, että nykyään kustantajat ovat vahvasti sitä mieltä, että mangaa kuuluu kääntää suoraan japanista. Vaikka Suomen mangamarkkinat ovatkin jo nähneet suurimmat huippunsa, ei suomenkielinen manga ole kuitenkaan katoamassa kauppojen hyllyiltä. Tulevaa voikin odottaa pienellä innolla, sillä uusia julkaisuja ja vanhojen suosikkien jatko-osia tullaan vielä lukemaan jatkossakin suomen kielellä.

Appendix 2 Interview with Sangatsu Manga / Punainen jättiläinen

February 2026 – Questions sent via email and their answers from the Publishing Director of Sangatsu Manga and Punainen jättiläinen Antti Valkama

Mitkä tekijät vaikuttavat siihen, mitä mangasarjoja valitsette julkaistavaksi suomessa? Minkälaisia sarjoja teidän mielestänne kannattaa ylipäätänsä julkaista?

> Teoksen tunnettuus, tarinan + kuvituksen kiinnostavuus, markkinatilanne, omat rahkeet. Ainakaan kovin pienelle yleisölle suunnattuja teoksia ei kannata julkaista. On oltava mahdollisuus, että myös muut kuin kovat mangafanit ostavat.

Käsittääkseni Sangatsu Mangan ja Punaisen jättiläisen julkaisut käännetään suoraan japanista. Onko tämä totta, vai oletteko jossain vaiheessa julkaisseet joitain sarjoja, jotka ovat käännetty välikielen kautta? Mitkä ajatukset ovat johtaneet siihen, että käännätte suoraan japanista?

> Kaikki japanilainen käännetään japanista. Mutta esim. kieliopassarja Kanji de Manga käännettiin englannista, koska se on alkukieli. Eli alkukieli ratkaisee. Normaalissa mangassa se kuitenkin on aina japani. Meillä on aina riittänyt japaninkielisiä kääntäjiä, joten emme ole edes harkinneet välikielen käyttöä. Se vain suotta etäännyttäisi sisältöä alkuperäisestä.

Nykyään mangaa myydään lehtipisteissä ja kirja/sarjakuvakaupoissa. Oliko tilanne sama myös 2000-luvun alussa, kun Dragon Ballin ensimmäiset pokkarit julkaistiin, vai myytiinkö mangaa aluksi vain lehtipisteissä?

> Eiköhän sitä ollut kirjakaupoissakin. Tarkemmin en osaa kertoa, kun en ollut silloin Tammella eli Sangatsun emoyhtiöllä töissä (muuten kuin freelance-kääntäjänä). Lehtipisteet ovat silti yhä se suurin myyntikanava.

Muualla maailmassa mangaa julkaistaan paljon myös digitaalisesti. Onko teillä kiinnostusta tai suunnitelmia lähteä julkaisemaan ja myymään suomenkielistä mangaa digitaalisesti esim. jollain sivustolla tai sovelluksessa?

> Jos e-kirjamarkkinat kasvavat Suomessa merkittävästi, sitten varmaan myös mangaa tuodaan saataville diginä. Tällä hetkellä äänikirjat ovat iso bisnes, mutta muut e-kirjat eivät niinkään. Ei siis olisi vielä odotettavissa erityistä myyntiä.

Tällä hetkellä suomessa on julkaistu kaikista vähiten josei-kohderyhmän mangaa; yhteensä vain 36 pokkaria. Shounenia on julkaistu yli tuhat pokkaria, mutta myös shoujoa ja seineniäkin on kumpaakin julkaistu yli 400 pokkaria. Minkälaisia ajatuksia tämä herättää? Onko teillä kiinnostusta alkaa julkaista tämän kohderyhmän sarjoja tulevaisuudessa?

> Luokitukset ovat ulkomaita ajatellen jossain määrin liukuvia. Esimerkiksi ns. shōnenkaman lukijoista on Suomessa usein arviolta puolet tyttöjä/naisia. Mutta pääpaino on pysynyt nuorempien sarjoissa, koska ne ovat yleensä menestyneet paremmin kuin vanhemmille suunnatut. Eli kokemus ohjaa. Mitään periaatteellista rajoitusta ei kuitenkaan ole, sillä mietimme aina jokaista teosta (eli sarjaa) erikseen. Jos nk. josei-teos vaikuttaa siltä, että se luultavasti saa riittävästi lukijoita, sitä ei hyljeksitä japanilaisen kohdeyleisön perusteella.

Suomessa on julkaistu hyvin vähän seksuaalivähemmistöistä kertovaa mangaa. BL-mangaa on julkaistu 23 pokkaria, mutta GL-mangaa ei ole julkaistu edes yhtä ainuttakaan pokkaria. Minkälaisia ajatuksia tämä herättää? Onko jossain vaiheessa todettu, ettei tällaista mangaa kannata julkaista?

> Punaisen jättiläisen nimissä julkaistiin tosiaan joitakin teoksia, jotka sijoittuvat kokonaan tai osin BL-kategoriaan. Menekki ei ollut kummoinen. Siksi vielä pienemmän yleisön GL-sarjat eivät ole tuntuneet mielekkäältä julkaistavalta. (Toki jos olisi tarjolla jokin superhitti, niin pitäisi harkita.) Kuten sanottu, Suomi tosiaan on turhan pieni markkina pienen kohdeyleisön teoksille.

Vuonna 1985 Jalava julkaisi ensimmäisen suomenkielisen mangan, Hiroshiman poika, mistä on nyt kulunut 40 vuotta. Sangatsu Mangakin on jo julkaissut mangaa suomessa yli 20 vuotta, vaikka muut kustantajat ovatkin lopettaneet mangan julkaisun vuosien varrella. Vuoden 2025 loppuun mennessä Sangatsu Manga ja Punainen jättiläinen ovat julkaisseet yhteensä 1389 pokkaria mangaa, mikä on lähes 70 % kaikesta suomessa julkaistusta mangasta. Mitä te ajattelette omasta asemastanne, historiastanne ja tulevaisuudestanne suomen mangamarkkinoilla?

> Tammen omistama Sangatsu Manga toi mangan ruokakauppoihin ja kioskeihin ja käynnisti näin mangabuumin Suomessa. Olin itse silloin mukana freelance-suomentajana, vuodesta 2006 ihan kuukausipalkkaisena ja myös toimittamassa, valitsemassa julkaistavia teoksia ja tekemässä kaikkea muuta julkaisubisnekseen liittyvää. On hienoa, että SM ja sittemmin samaan joukkoon liittynyt PJ-brändi ovat yhä elossa. Tällä

hetkellä molemmat omistaa H-Town Oy, ei enää Tammi. Muutos tapahtui vuonna 2023. Uutuusjulkaisuja tulee vähemmän, koska firma on pienempi (julkaisuihin täytyy näet panostaa rahaa ennalta), mutta tarkoitus on jatkaa vielä hyvän aikaa. Työ on itsessään kiinnostavaa ja lisäksi sekin palkitsee, kun esim. coneissa näkee ja kuulee, että julkaisumme tosiaan ovat monelle tärkeitä.

Appendix 3 Catalogue of Finnish Manga Releases

Starting on the next page is the catalogue created for this study. Series are listed in alphabetical order, although due to how excel sorts text, volumes are not listed in numerical order. Further information about the catalogue can be found in chapter 3.1.1.
